# Technical Solution Competence for Demanding Customers

**Four companies. Three Swiss Locations in Münchenstein, Muttenz and Reiden. One in Germany, Rheinfelden. 400 employees. Customer solutions «From Packaging to Processing». From safe industrial packaging to proven handling and processing systems.**

Family run. With a history that goes back 125 years. With employees who are passionate about quality and customer satisfaction. With a management team that likes to invest in people, in production and in processes. With its finger on the pulse of time. And at the same time, consciously aware of the environment.

The four companies of the Müller Group develop, manufacture and sell

- industrial packaging made of mild steel, fibre, plastics and stainless steel,
- storage, transport and process containers out of stainless steel,
- handling, dosing and cleaning systems.

Müller Group offers its customers individual solutions for a wide range of applications in the pharmaceutical, chemical, hygiene, cosmetics, flavor and fragrances, food, mineral oil, paint and coatings, semiconductors, storage and distribution industries.

## Certified management systems of the Müller Group

- ISO 9001 Quality Management System
- ISO 14001 Environmental Management System
- ISO 45001 Occupational Health and Safety Management System
- FSSC 22000 Food Safety Management System (Müller AG Verpackungen)
- BRC Global Standard for Packaging Materials (Müller AG Plastics)

# UN-Approved Drums made of Mild Steel, Stainless Steel and Fibre

**Müller Packaging – quality leader in the production of industrial packaging made of mild steel, stainless steel and fibre – manufactures in its Swiss locations Münchenstein and Reiden UN-approved packaging for liquid and solid hazardous goods. It offers customer solutions including tight head, composite and open head drums in various versions and sizes, up to a capacity of 250 liters.**

The in-house design department together with the machine and tool building departments ensure that service and maintenance drive the further development of Müller's production while implementing quickly and reliably customer requirements.

Müller Packaging has positioned itself as an innovative and competent partner in markets all around the world. Customers appreciate the high and constant quality and the consistent adherence to schedules. In 2015 Müller was certified according to FSSC 22000, an international standard for food safety management systems.

# Plastic Packaging and Technical Moldings

**Müller Plastics is producing at their Swiss site in Muttenz qualitatively outstanding packaging containers and technical parts made of plastics. The company is manufacturing on multiple industrial blow molding machines canisters, bottles and drums with a capacity from 3 up to 60 liters as well as a wide range of different molded technical parts. A trade assortment of drums and large containers up to 220 liters is rounding up the range of goods.**

Müller Plastics has established itself in the market as a specialist with «MultiCan» barrier containers manufactured with the six-layer Coex Process. Besides an EVOH barrier the MultiCan line is equipped with an antistatic outer layer and meets the latest requirements for easily inflammable contents according to standard TRGS 727. Since 2007 Müller Plastics is a BRC-certified food industry packaging manufacturer.

# Storage, Transport and Process Containers out of Stainless Steel

**Müller DrumTec in Rheinfelden (Germany) is a leading manufacturer of storage, transport and process containers out of stainless steel. The company manufactures all its containers in-house, in a combination of automated series production and traditional craftsmanship – and is committed to the very highest quality standards.**

Its globally recognized expertise encompasses a wide portfolio of lidded and tight head drums, as well as single- and double-walled drums, which can be used for heating or cooling according to specific applications. This portfolio is complemented with butterfly valves and process components for filling powders and viscous media.

Standardized units ensure highest combinability of the modules. Yet individuality is decisive for success. The designs are created with a focus on the solution, in close cooperation with the customer. Continuous further development of its portfolio makes Müller DrumTec the sought-after expert for container customer solutions in a wide range of industries.

# Integrated Handling, Dispensing and GMP Washer Systems

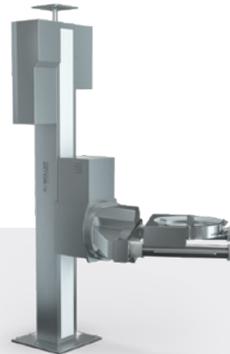

**Müller Processing plans, designs and produces handling equipment, dosing systems and GMP washers in Münchenstein (Switzerland) and in Rheinfelden (Germany). Customer service ensures professional care of the equipment during its whole life cycle.**

Müller Processing is a specialist in interface management and therefore offers coordinated, sophisticated handling systems, such as lifting columns, blenders and pallet changers. Dosing systems guarantee highest accuracy in the range of grams for formulating, charging, dosing and filling of bulk goods. The containment valves resulting from the competence partnership with the company Andock ensure contamination-free transfer and filling of toxic media. GMP cleaning systems allow validated cleaning processes for a wide range of customer requirements.

Years of experience and comprehensive competences make Müller Processing the ideal globally present partner for turnkey custom made systems which are embedded in the overall process.

Müller Processing will work out and implement proven, innovative and tailor-made solutions for projects of any size. Flexible, cost-optimized and with short delivery dates.

# Committed to the Environment and Society

The Müller Group works sustainably in all areas of the company. Established management systems help to manage and monitor sustainability aspects.

## Responsible business practices

At Müller Group, a culture of trust is established, ethical standards are observed and data is handled with care. The management of the Müller companies monitor their business-specific risks continuously and keep up to date with legal requirements.

### Healthy work

- Müller employees work at safe workplaces in a healthy atmosphere. Accident prevention is firmly anchored in everyday life.
- In the company, diversity and community are promoted to create a spirit of togetherness.

### Environmental protection and circular economy

- Installed air filters and wastewater systems protect the environment.
- Across all means of production the recycling quota is consistently adhered to.
- Müller products contribute to the circular economy.

### Sustainable market offer

- Müller customers receive products and services of the highest quality, making them durable and safe.
- Products are manufactured in a lean way which conserves resources.
- Services extend the service life.

### Energy efficiency

- All Müller companies pay attention to their energy consumption and promote alternative energies.
- The companies have formulated CO<sub>2</sub> emission targets, which they regularly monitor and track.
- Energy-saving lighting, use of process heat, thermal insulation and other measures support energy efficiency.
