

What will you do when the power goes out? Introducing the perfect backup plan – **the sonnenBatterie.**

Power outages are always inconvenient and often dangerous. The sonnenBatterie offers a clean, quiet, and reliable battery system that provides with comfort, security, and peace of mind. Adding a sonnenBatterie system helps you keep your house safe during an outage – powering your essential needs such as safety lights, central AC and furnace fans, refrigerators and phone chargers.

Protect your home and your energy investments

Did you know that your solar system will not work if the grid goes down?

By adding a sonnenBatterie eco, however, you can continue to use your solar power even during grid failures. Beyond backup power, the sonnenBatterie smart energy management system maximizes your use of solar every day, saving you money on electric bills and increasing the return on your clean energy investments.

“Such a Safe Feeling” with sonnenBatterie

When the grid went out in McCall, Idaho, Jean Odmark was the only person in her neighborhood whose power stayed on thanks to her sonnenBatterie and her solar system. **“I was terrified last winter when the power was going out for days and I needed something that would keep my house powered during winter snowstorms, I found it in my sonnen. It was such a safe feeling.”**

The sonnenBatterie Difference

16,000+

Global sonnenBatterie installations

Up to 100%

Power from clean energy

All-Inclusive

Plug & play all-in-one storage technology

10YR

10 Year /10,000 cycle warranty on batteries

The sonnenBatterie offers some key advantages over alternative sources of backup power.

- Keeps your solar modules producing power when the grid goes out to **keep your lights on**
- **Batteries will last 20 years** before the needing to be replaced
- **Fully UL certified** for safe installation anywhere in your home
- **Clean, all-in-one design** that fits into any room and is easy to install
- System monitoring and **visibility into energy usage** via the web portal and mobile app
- **Lowest cost to own and operate** with highest return on investment
- **No annual maintenance** and no ventilation required

	sonnenBatterie eco Lithium iron phosphate battery	Lead Acid Battery	Gas Generator
