LIVA Power Management Systems GmbH

LIVA Power Management Systems GmbH ("LIVA") is a subsidiary of AMG Critical Materials NV and operates in the B2B market for industrial and large-scale energy storage systems (4 to 100+ MWh) for demand- and supply-side energy management to reduce energy costs and CO_2 emissions. LIVA builds tailor-made hybrid energy storage systems (hybrid ESS) for the implementation of the industrial energy transition. We strive for a consistently sustainable energy supply to secure the prosperity of current and future generations. For this purpose, we are creating innovative energy systems as part of the new green energy world.

AMG Critical Materials N.V. is a global company for critical materials at the forefront of CO_2 reduction trends. AMG manufactures advanced specialty materials and offers vacuum furnace systems as well as services for the transportation, infrastructure, energy, and specialty metals and chemicals end markets. AMG operates globally with production facilities in Germany, the United Kingdom, France, the United States, China, Mexico, Brazil, India, Sri Lanka and Mozambique, and has sales and service offices in Japan.

As soon as possile, for our location in Karlsruhe we are looking for an

Software Developer (m/w/d) - C# | AWS | Energiemanagement
Fulltime (40h/week)

In your new job, you can expect these exciting tasks:

- Further development and optimization of our energy management system
- Design and implementation of software architectures as well as definition and implementation of interfaces
- Responsibility for a sustainable and efficient software architecture
- Technical guidance and support for junior developers
- Independent familiarization with new technologies and development of innovative solutions
- Optional: administration and integration of AWS services

What we are looking for:

- You have successfully completed vocational training or a degree in electrical engineering / computer science or similar
