

Wer ist am Grünsten?

Some semi-facts:

1. You can only enjoy shade when the sun is shining.
2. Repetition is everywhere. I mean, everywhere.
3. Nostalgia always gets it wrong.
5. Peter Thiel genuinely thinks Greta Thunberg is 'the anti-Christ'. This explains a lot.
6. According to numerology, 74 is simultaneously 11 and 2 in disguise, which is certainly very reductive.
7. Idiosyncrasy is fine, until you realise no-one understands.
8. Aphorisms are facts that throw no shade.
