

THE LONDON SPRAY  
— COMPANY —

## **Sustainability Policy**

At The London Spray Company Ltd, we are committed to managing our business in an environmentally conscious manner. We are committed to reducing the negative effects of our behaviour on the environment and the areas in which we operate. We understand that what we do affects these regions.

Our sustainability strategy outlines our commitments as well as the actions we will take to fulfil them.

**Reduce our Ecological Footprint:** We will calculate our carbon footprint, disclose it, and set emission reduction targets. We will give energy efficiency, renewable energy, and low-carbon transportation options top priority in our activities. We will also collaborate with our clients and vendors to lessen their carbon footprint.

**Decrease Waste and Promote Recycling:** In our commercial endeavours, we will promote recycling and waste minimisation. We'll make an effort to use fewer single-use products and will promote recycling whenever possible. We will communicate with our suppliers and customers to reduce waste and promote recycling.

**Environmental Protection:** We will protect natural resources by using less energy, water, and raw materials during our activities. Additionally, we'll make an effort to obtain our materials from sustainable sources whenever possible.

**Supporting Regional Communities:** We will help the local communities where our businesses are located by fostering employment opportunities, supporting neighbourhood businesses, and giving to charitable organisations and community projects.

**Continued Progress:** We'll regularly assess and improve our performance in terms of sustainability, setting objectives and monitoring our progress towards them.

In order to confirm that we are accomplishing our objectives and identify potential areas for improvement, we will also communicate with our clients.

We are committed to keeping our stakeholders, including clients, employees, investors, and the broader public, informed about our progress and performance in terms of sustainability.

Every year, we review this policy to make sure it is still effective and supports our sustainability goals.

Signed,

J. Booth - 3rd January 2026

John Booth  
Director
