Rx-able swimming  
goggles

With input from Pro Triathletes and optical scientists, Progear Sportshades are designed to deliver true optical performance at every stage of the race, including transitions. The cutting-edge Progear lens formula is customized to correct (Rx) and enhance your vision while multiple lens features, brought by combination of lens tints/materials/coatings, help athletes to tackle adverse course and weather conditions.

**BUILD TO  
PERFORM**

VISION ENHANCEMENT  
EYEWEAR

# PROGEAR

One-piece, internal Spring Hinge fitting broader range of headwidths

Anti-slip, adjustable endtips with stainless steel core for professional adjustment at the opticians

Lightweight, flexible TR90 material

Anti-slip, adjustable, non-allergenic rubber nose pads

Plano sunlenses in polycarbonate(PC), polarized PC and NXT Transition options

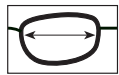

"Rx-able Clip-on" with adjustable stainless steel core double injected with nylon to prevent lens scratches. Inexpensive and versatile optical correction for consumer.

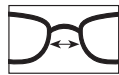

Interchangeable lens system, but with 6-base lens curve vs. most 8-base sport wrap in the market, i.e. more accommodative for direct Rx lenses and less expensive solution for consumer

- Most popular style for runners world wide
- Maximum central and peripheral visual clarity
- Wider range of corrective power accommodation
- Interchangeable lens system with Rx Adaptor
- Optional Rx-able clip-on as economical solution
- Super light weight (only 28.5g)

# SPRINTER

PROGEAR  
SPORTSHADES

Fully adjustable endtip with metal core covered with anti-slip, non-allergenic rubber for maximum snug fit.

Rimless nylon shield lens offers widest field of vision and unobstructed view. Impact resistant and NO cracks, NO chipping during lens glazing.

Clip-in shield-temple engagement system for easy customization by opticians.

Ready-to-wear plano polycarbonate lens with decenter geometry offers optical quality precision. Remarkable cosmetic with contrasting Revo-mirror combination.

Double-molded clip-on bridge with adjustable nose pads.

Frame, lens color designs inspired by pro cycling team jerseys.

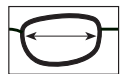

Shield lens(w/ 7-base front curve) pre-cut with eye opening when ex-factory; Inner lens(both plano and prescription possible) edged with standard nylon groove (0.7x0.7mm groove size, 7 to 8-base groove curve).

EAN code : 4894303130238

Follow steps in picture 1 through 5 below. Insert a rubber seal(O-ring included in the package) in the frame groove from the front. The Rx lens is then pushed into the swimming goggles from the front. It is important for the rubber seal (O-ring) be properly applied to the inner edge of the frame. The rubber seal must completely disappear behind the lens after insertion. If necessary, push the lens forward out of the frame again and readjust the rubber seal. In case a small portion of the O-ring is dislocated after the lens is plugged in, apply a little force on the lens in the outward direction and use your finger nail to squeeze in the O-ring (picture 6).
