

My brain is super fast!

It gets everywhere on a red speedy motorbike.

When it's excited, it goes very fast!

Vroooooom!

A fast brain needs strong brakes

I have brakes...

but they work better on a bike.

My brain rides a red speedy motorbike

When you go fast, you need to

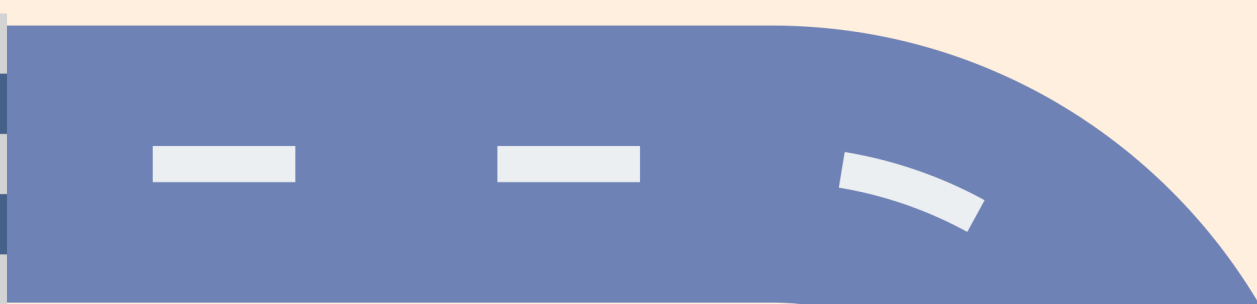

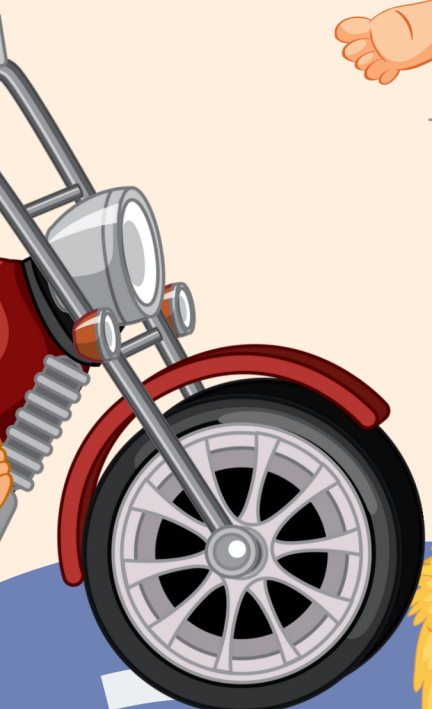

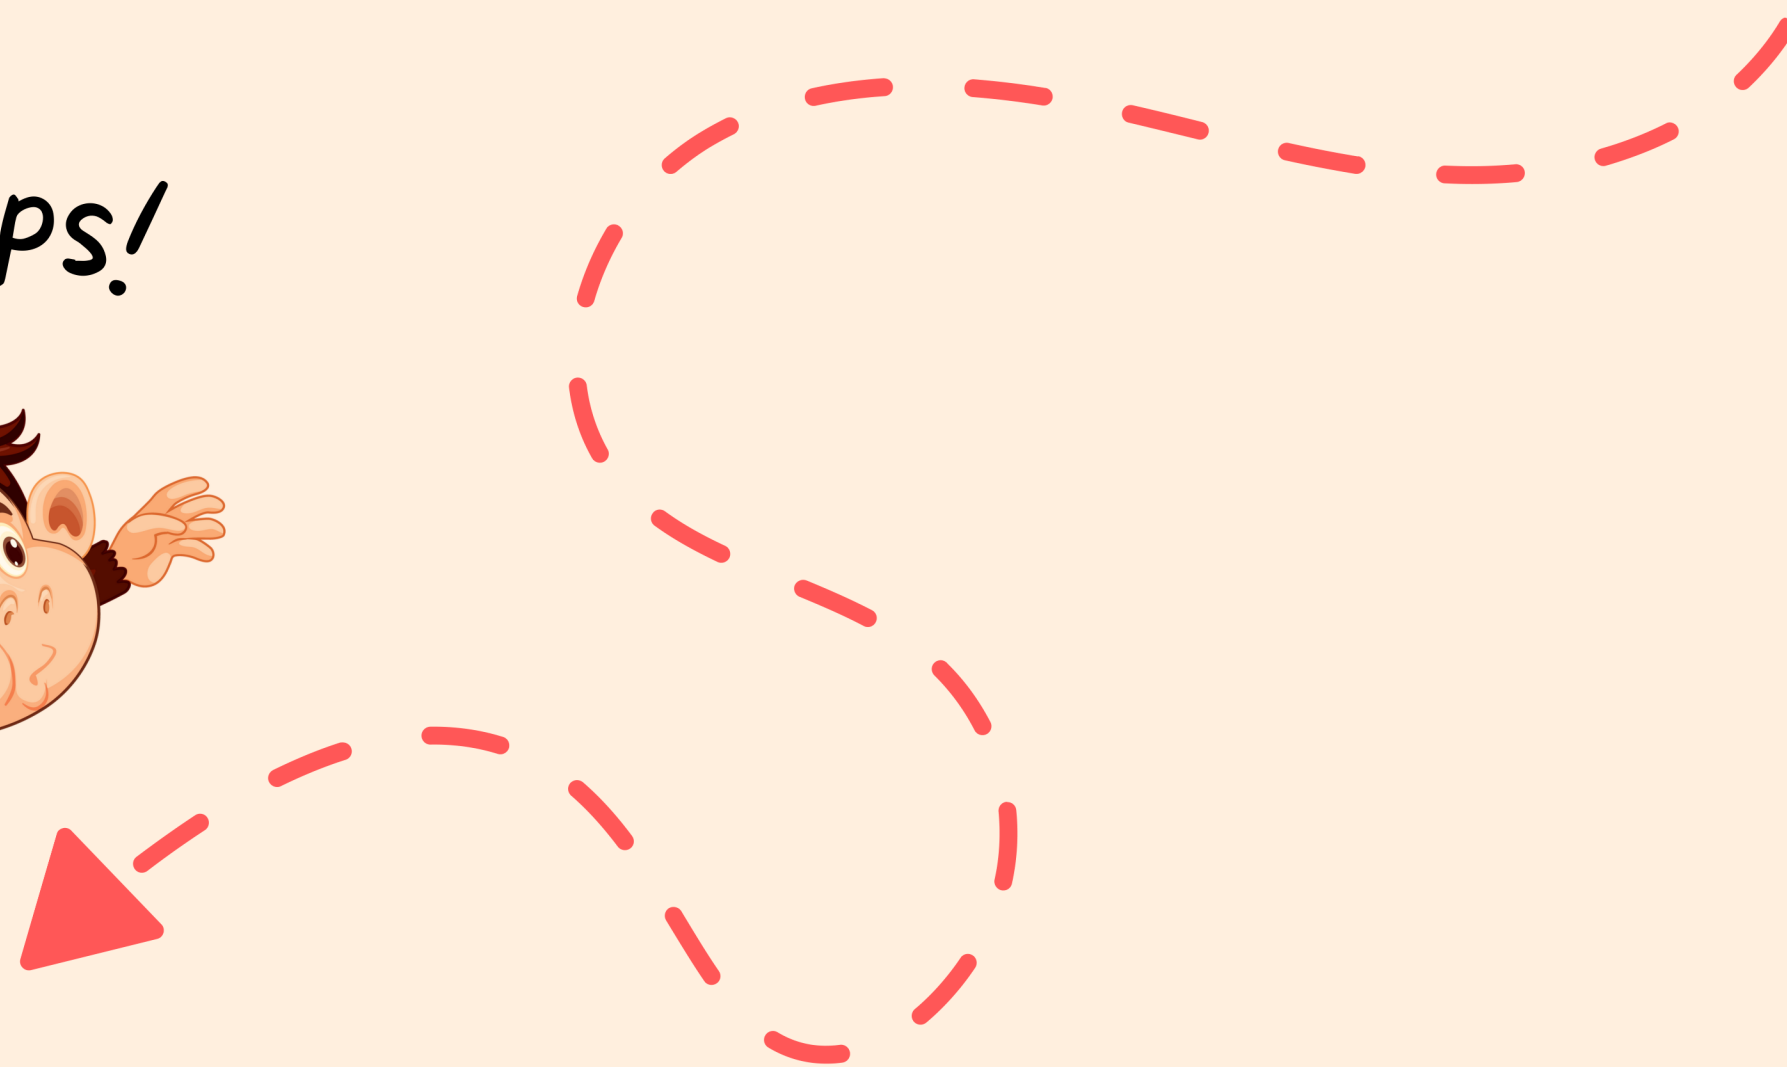

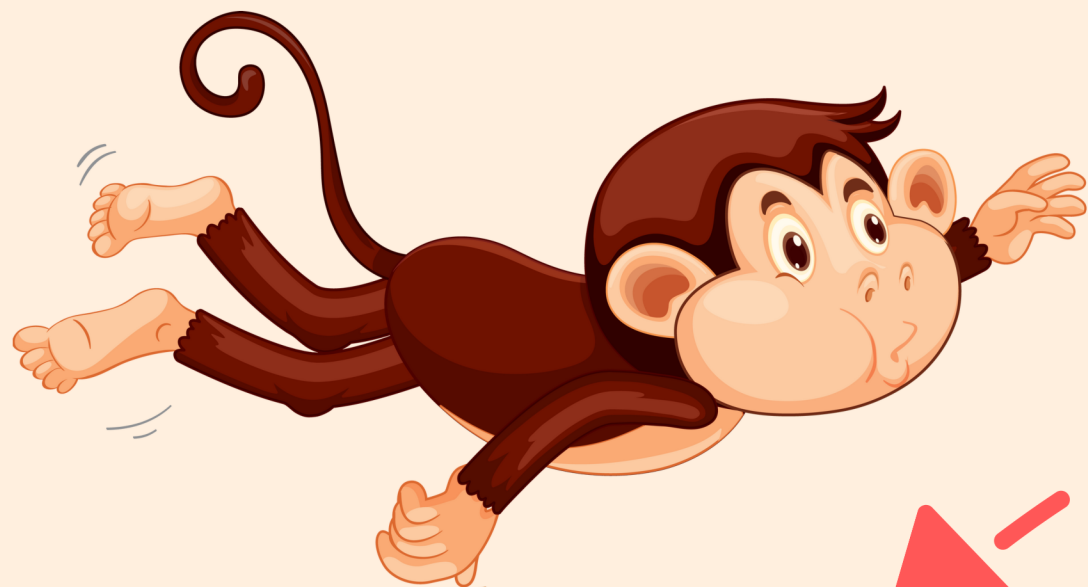

just in time

to avoid

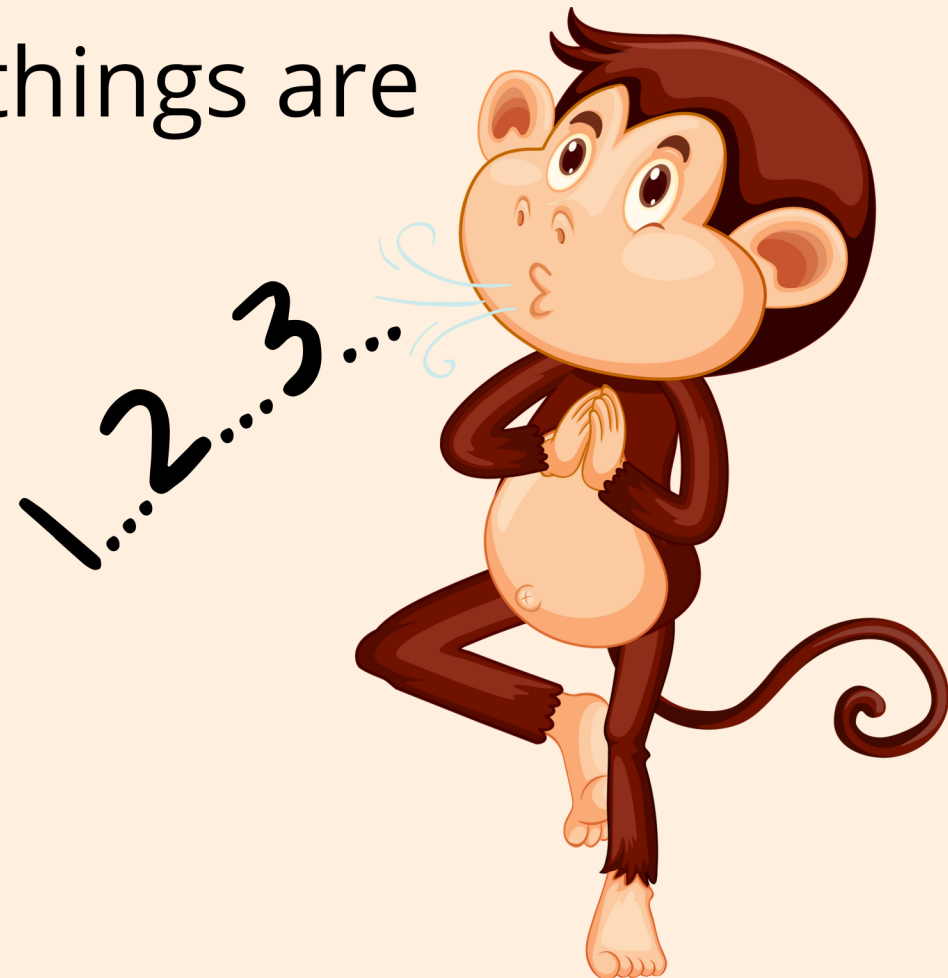

tricky situations.

Oooooops!

I can make my brakes stronger

Breathing and **counting**
when I know things are
getting hairy!

A special **toy** that I keep in
my pocket to use when I am
bored.

Medication to help me
focus. It works like glasses
for people who have
trouble seeing.

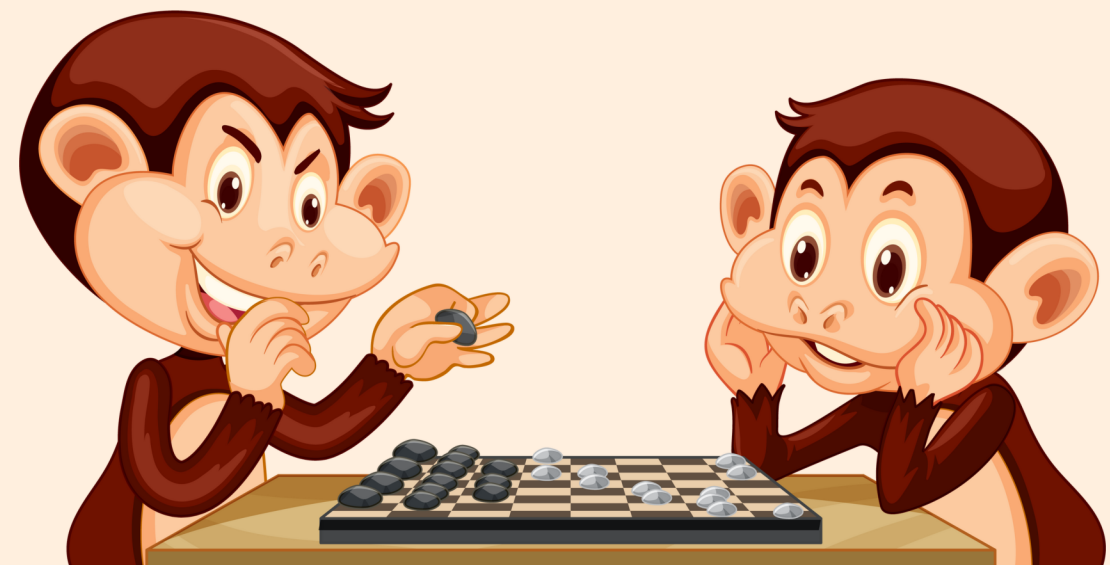

I love my fast brain

It makes me who I am

I have energy to play all day

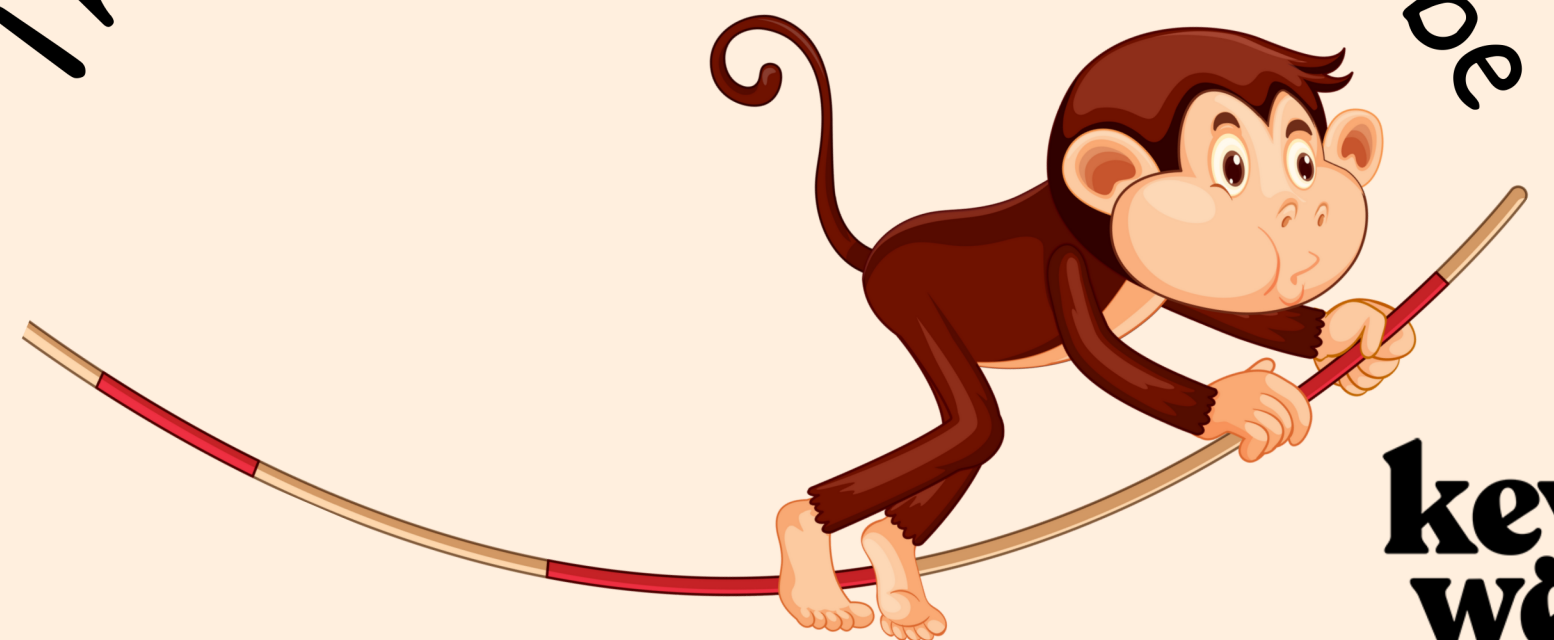

I see things that others miss

I'm curious about the world

I'm brave when I need to be

Do you have a fast brain like mine?
