DIY DECK TILE

COMPOSITE TILE

VIBRANT MONO-COLOUR RANGE

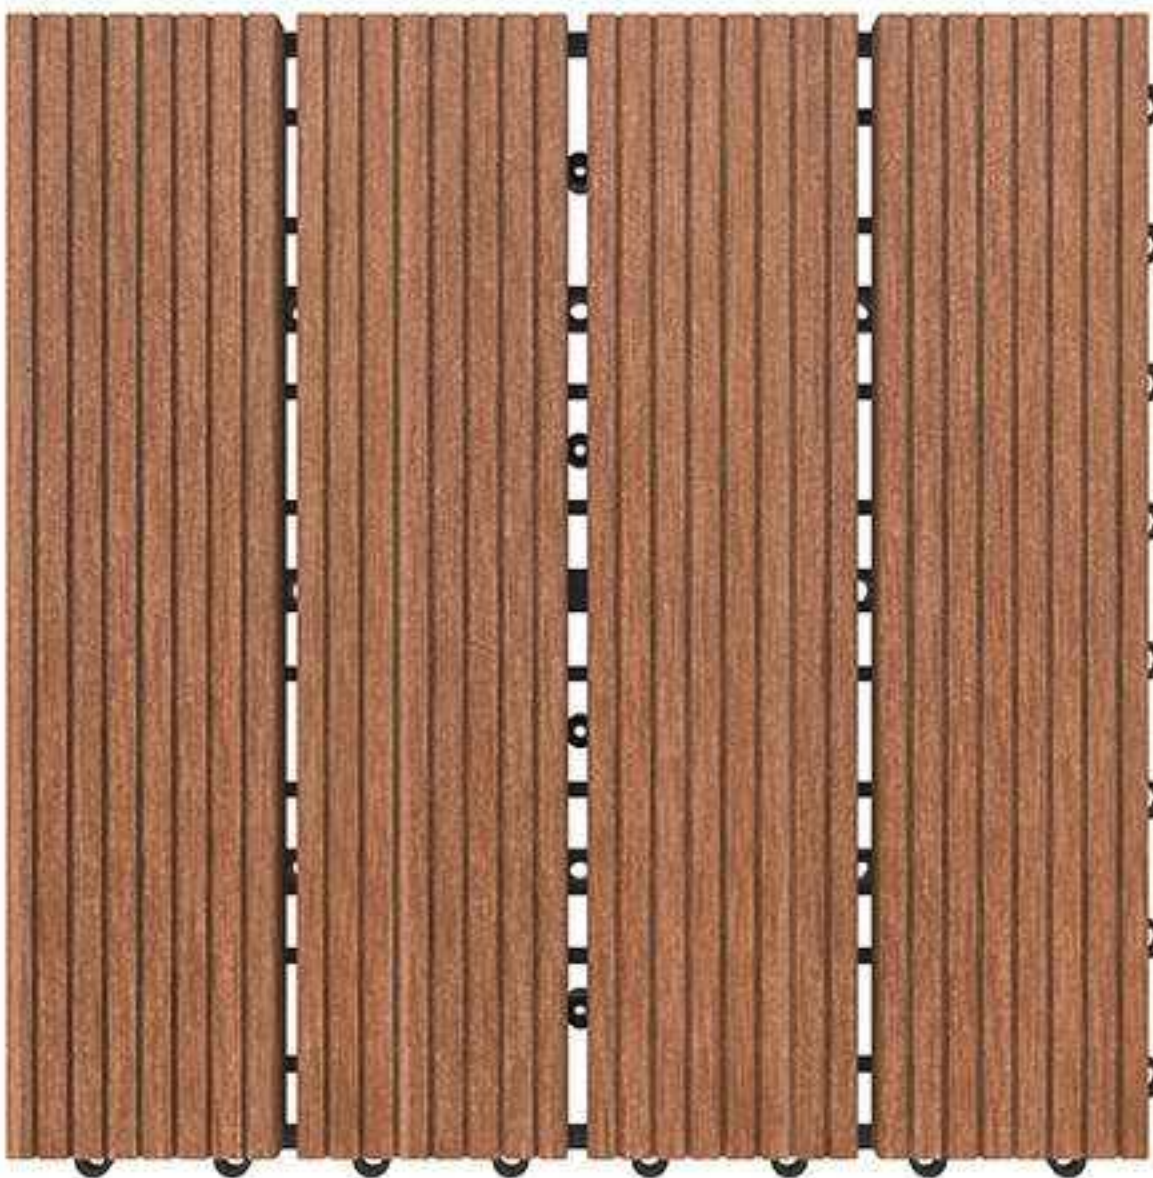

Composite tile is our first generation material technology. The engineered cellulose-polymer composite consists primarily of bamboo and high-density polyethylene. Additives are incorporated, enhancing the materials durability and colour-fastness of the material.

CO-EXTRUSION CAPPED COMPOSITE TILE

NATURAL BI-COLOUR RANGE

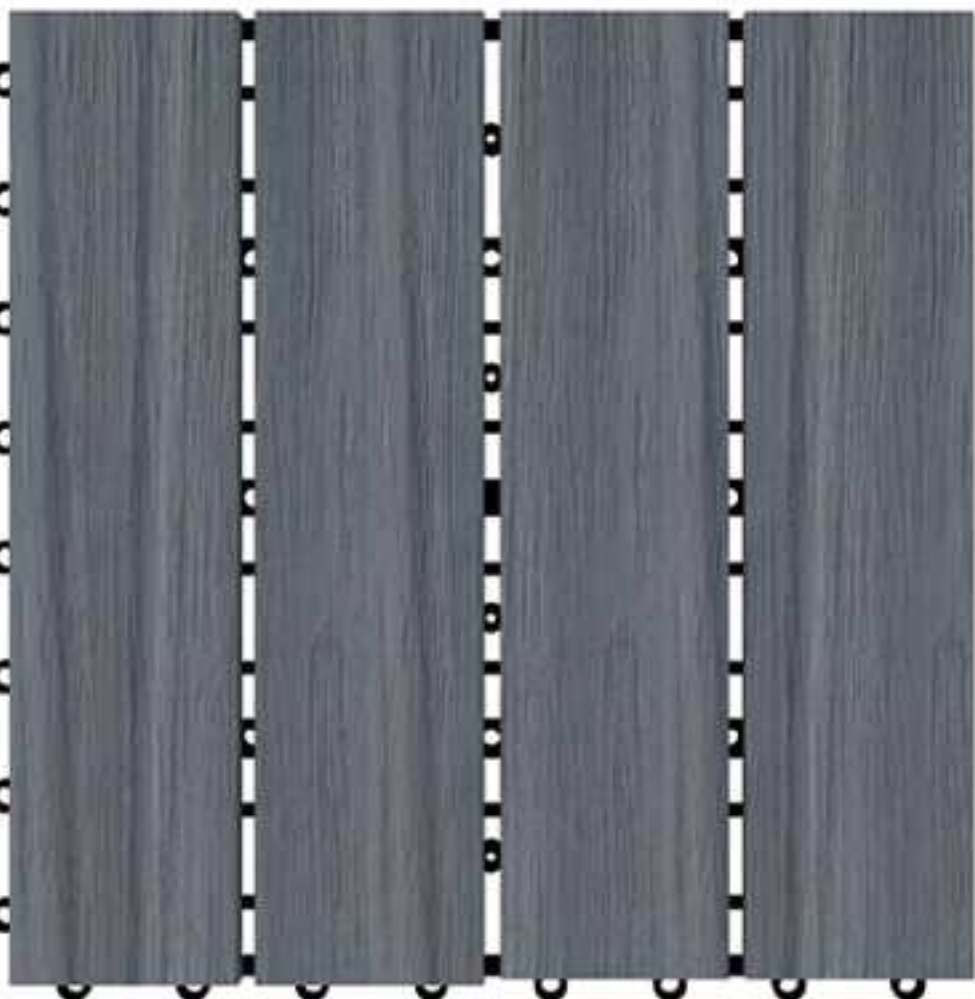

The proprietary manufacturing process used in the creation of perfecto floor achieves a variable and authentic colour finish, comparable only to natural timber. This advanced and innovative technology allows for incredible colour blending, providing one of the best looking composite boards available. Whilst the capped composite technology provides protection from fading and staining in the harshest environments.

APEX TILE (CELLULAR PVC CAPPED COMPOSITE)

ULTRA- REALISTIC COLOUR RANGE

Perfecto floor ultra realistic colour range adds an extra layer of vibrant to each board to enhance the natural look of your composite project. The variance in shades within a single composite profile beautifully represents the colour tones found in timber, making your composite all the more striking. Dual tone colours are ideal for mid-to-large-scale composite decks and projects, or other areas that are all about that natural look. Whilst the polymer capping material also boasts immense strength and resistance to the elements.
