Immersive virtual tour experience

2D Drawings

INR 5 per sq ft

Construction-ready plans (residential only)

- **Additional Revisions**

Beyond included rounds: INR 500 per revision/area

Payment Structure & Process

TERMS

We maintain a transparent and straightforward payment structure designed to protect both parties whilst ensuring smooth project progression. Our milestone-based approach means you can track progress at every stage, with clear deliverables tied to each payment.

01

Initial Advance Payment

70% advance required before project commencement. This secures your booking and initiates the design process.

03

Model Approval Checkpoint

Review 2–3 model angles to verify shape and arrangement. Request adjustments before we proceed to high-quality rendering.

02

Model Development & Preview

We share initial SketchUp screenshots for your approval. These basic model images confirm layout, proportions, and overall design direction.

04

Final Payment & Delivery

Remaining 30% due after model approval but before final renders. Upon payment, receive your full-resolution, watermark-free images.

 **Example:** For a INR 20,000 project — pay INR 14,000 to start, then balance INR 6,000 before receiving final 4K images.

Revision & Design Freedom Policy

IMPORTANT GUIDELINES

What's Included

2 revision rounds are included with every package by default. Revisions cover model changes, texture updates, and minor layout adjustments.

- Material and colour modifications
- Furniture repositioning
- Lighting adjustments
- Texture refinements

If we miss something you clearly communicated in writing, we'll rectify it at no additional cost.

Design Freedom

When you provide *design freedom*, we create based on our professional judgement. Later changes due to personal preference count as revisions.

Additional revisions: INR 500 per Image

Example: You requested "modern theme" and we delivered accordingly. Later providing a classical reference would constitute a revision.

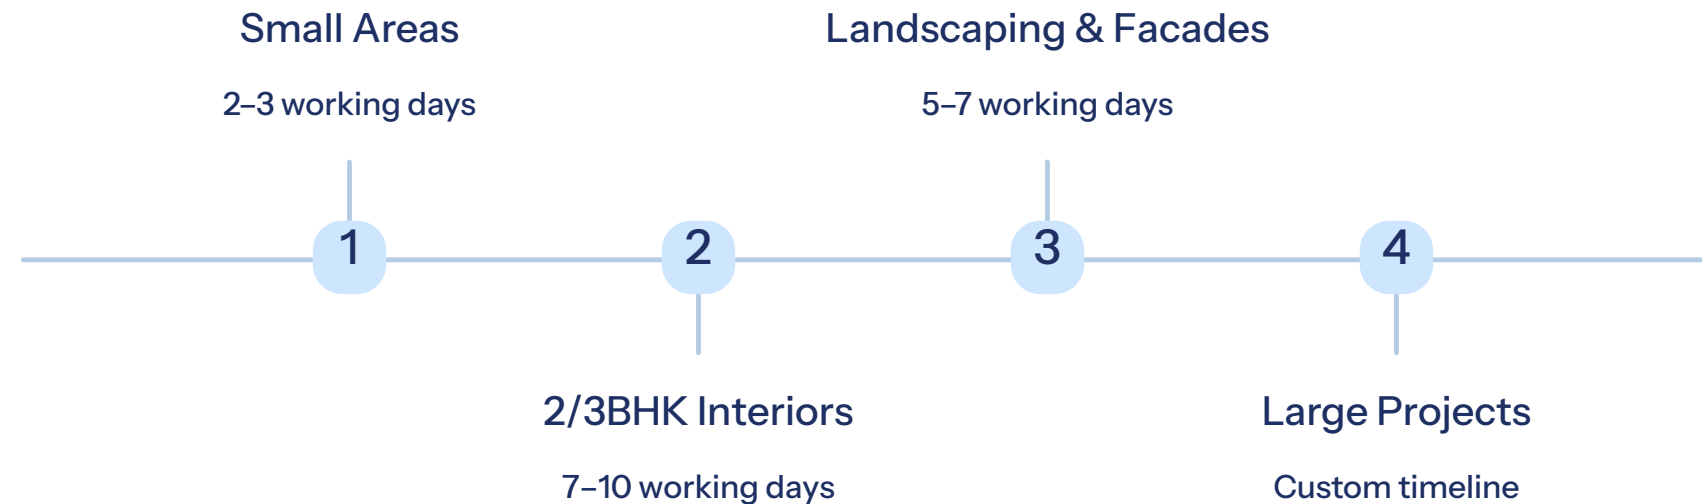

Project Timelines & Communication

 TIMELINES

 COMMUNICATION

Clear communication is the foundation of successful projects. All feedback and inputs must be shared in writing via our designated WhatsApp group, ensuring clarity, accountability, and faster revisions. This documentation trail prevents misunderstandings and keeps everyone aligned.

 All timelines are subject to timely client responses and clear communication.
