

The actions of Hamas on October 7 were heinous, calculated, and inexcusable for any reason. They must be eliminated. Having said that, the right-wing government of Netanyahu has been essentially attacking the Palestinians with his liberal settlement policy and failure to give them their own state. This war was totally foreseeable. What the Nazis did to the Jews, they are now doing to these poor people.

This kind of extremist right-wing hate is gaining traction all over the world and is a serious threat to our existence. In this country, it is personified by the MAGA Republicans who must also be eliminated.
