

SC 1026 – LIVE ACTIVE CERTIFIED ORGANIC YEAST

KEY BENEFITS

- **ECOCERT approved for organic operations**
- **Improves digestive and overall health of all animals**
- **Optimizes performance of draft and working horses**
- **Increases egg production in poultry operations**
- **Optimizes feed conversion and nutrient absorption**
- **Maximizes weight gain of all livestock raised for meat**

APPLICATION RECOMMENDATIONS

- **5% of Total Mixed Ration**
- **Poultry: 2.5% of Total Mixed Ration**
- **Available in grass fed and grain fed blends**
- **Specific recommendations are farm dependent**
- **Sterling Agriculture, Inc. consultation is recommended**

Yeast Plus Non-Ruminant

TECHNICAL INFORMATION

Yeast Plus Non-Ruminant is a proprietary blend of live, active, organic certified yeast strain (*Saccharomyces Cerevisiae* Strain 1026) that thrives in the anaerobic, acidic and thermal conditions of gut environments. Among its many benefits, SC- 1026 reduces pathogenic outbreaks, optimizes weight gain and horse performance. Allow four weeks for full effectiveness.

Additional details:

- Yeast Plus Non-Ruminant is a naturally occurring active dry yeast probiotic that aids in balancing digestive microbiota and improves overall health of the animal.
- Yeast Plus Non-Ruminant aids in digestion of fiber, carbohydrates, proteins and minerals to help maintain digestive tract function of all animals.
- Yeast Plus Non-Ruminant numerically reduced the severity of intestinal lesions and coccidiosis related mortality in male broilers.
- Yeast Plus Non-Ruminant improved meat quality and tenderness in male broilers.
- Broiler supplementation with Yeast Plus Non-Ruminant has shown superior mean cumulative feed efficiency and quicker weight gains (10% over 6 weeks) vs. not supplemented control groups.
- Egg layers supplemented with Yeast Plus Non-Ruminant showed increased egg production of 9% vs. not supplemented control groups.
- Yeast Plus Non-Ruminant supplementation in foals and young horses aids in the formation lean muscle tissue.
- Yeast Plus Non-Ruminant helps to improve daily function of high-performance horses by fostering a digestive microbial environment that can removed lactic acid from gut to prevent digestive stress and from muscle to delay fatigue.
- In geriatric horses and horses that struggle to stay in good condition, supplementation with Yeast Plus Non-Ruminant, was effective in achieving and maintaining good body weight.
- Yeast Plus Non-Ruminant increases feed efficiency to stimulate weight gain of all animals.
