

Yeast Plus Ruminant

SC 1026 – LIVE ACTIVE CERTIFIED ORGANIC YEAST

KEY BENEFITS

- **ECOCERT approved for organic operations**
- **Optimizes rumen function across wide pH swings**
- **Improves digestive and overall health of all animals**
- **Increases butter fat and protein milk components**
- **Optimizes feed conversion and growth rates**
- **Maximizes weight gain of all livestock raised for meat**

APPLICATION RECOMMENDATIONS

- **5% of Total Mixed Ration**
- **Available in grass fed and grain fed blends**
- **Specific recommendations are farm dependent**
- **Sterling Agriculture, Inc. consultation is recommended**

Yeast Plus Ruminant

TECHNICAL INFORMATION

Yeast Plus Ruminant is a proprietary blend of live, active, organic certified yeast strain (*Saccharomyces Cerevisiae* Strain 1026) that optimizes rumen function and increases milk components. Allow four weeks for full effectiveness.

Additional details:

- Yeast Plus Ruminant is a naturally occurring, rumen specific active dry yeast probiotic that optimizes rumen function.
- Yeast Plus Ruminant is a dairy farm proven microbial technology that is fully viable, and metabolically active across wide pH swings in the rumen.
- Yeast Plus Ruminant stimulates lactation
- Across several trials, cows supplemented with Yeast Plus Ruminant show an increase of 2.7 lbs. of 3.5% fat-corrected milk (FCM) and had a better feed efficiency than control cows. Note: On the dairy farm, use the thumb rule of adding or subtracting one pound of milk for every one-tenth percentage point change above or below 3.5 percent fat test. For example, if a herd averages 70 pounds of milk with a 3.9 percent milk fat, the estimated pounds of 3.5% FCM would be 74 pounds.
- Yeast Plus Ruminant increases feed efficiency to stimulate weight gain and formation of bone and muscle tissue.
- Yeast Plus Ruminant is an all-natural source of quality digestible protein, amino acids, vitamins, and minerals.
- Yeast Plus Ruminant aids in digestion of fiber, carbohydrates, proteins and minerals to help maintain digestive tract function (prebiotic) and improves overall health of the animal.
- Yeast Plus Ruminant contributes to the development of healthy coat and skin of all animals.
