

## We offer all types of Covid tests for adults and children.

We have PCR tests for travel, rapid tests ready in less than 1 hour, and antibody tests to show proof of previous infection. If you, any family member or a friend needs any test for COVID-19, we can provide tests for children and adults and they don't need to be our patients. PCR test results will be ready in 2-3 days as required for travel. Rapid tests also may be used for travel, depending on the requirements of the destination state or country. We provide a certification of the test result. Appointment only. Call us at 301-984-0040.

### Schedule/Horario

Monday/Lunes: 8 am-5 pm  
Tuesday/Martes: 8 am-7 pm  
Wednesday/Miércoles: 8 am-5 pm  
Thursday/Jueves: 8 am-5 pm  
Friday/Viernes: 8:30 am-5 pm  
Saturdays/Sábados: 9 am-1 pm

Call us for in-person and tele-health visits.

### Vaccines: Influenza and others

A serious complication of the pandemic is that we have found many children and teens are missing their vaccines. We are calling all who are late or missing vaccines. Please, it is important for the health of your child and the community for your child to receive all needed vaccines.

We see sick kids on the same day, but not walk-ins. Our protocol is first a telemedicine and later in-person evaluation if required by the provider. If your child needs albuterol treatment, since that is

highly aerolized, we have strategies in place to help, like treatment in your car or in a special assigned room to protect others in our offices and families arriving afterwards. We have specialized equipment to sanitize the assigned room after the treatment is given.

### Vitamin B12 and D injectables

We offer Vitamin D and Vitamin B12 injectable, for all interested in having them. Ask us about requirement related to them and the frequency of treatments.

### ADHD in Children

It's normal for children to occasionally forget their homework, daydream during class, act without thinking, or get fidgety at the dinner table. But inattention, impulsivity, and hyperactivity are also signs of attention deficit hyperactivity...

## Ofrecemos el examen de COVID a niños y adultos.

Contamos con pruebas de PCR para viajes, pruebas rápidas listas en menos de 1 hora y pruebas de anticuerpos para demostrar una infección previa.

Si usted, algún familiar o amigo necesita alguna prueba de COVID-19, podemos proporcionar pruebas para niños y adultos y no es necesario que sean nuestros pacientes. Los resultados de la prueba de PCR estarán listos en 2-3 días según sea necesario para el viaje. Las pruebas rápidas también se pueden utilizar para viajar, según los requisitos del estado o país de destino. Proporcionamos una certificación del resultado de la prueba. Sólo cita. Llámenos al **301-984-0040**.

## Vacunas: Influenza y otras

Una complicación grave de la pandemia es que hemos descubierto que a muchos niños y adolescentes les faltan las vacunas. Llamamos a todos los que llegan tarde o faltan vacunas. Por favor, es importante para la salud de su hijo y la comunidad que su hijo reciba todas las vacunas necesarias.

Vemos niños enfermos el mismo día, pero no sin cita previa. Nuestro protocolo es primero una telemedicina y luego una evaluación en persona si así lo requiere el proveedor. Si su hijo necesita tratamiento con albuterol, ya que está altamente aerolizado, tenemos estrategias para ayudarlo, como tratamiento en su automóvil o en una habitación especial

asignada para proteger a otras personas en nuestras oficinas y familias que lleguen después. Contamos con equipo especializado para higienizar la habitación asignada después de que se da el tratamiento.

## Vitamina B12 y D intramuscular

Ofrecemos vitamina D y vitamina B12 inyectable por vía intramuscular para todos los interesados en tenerlas. Pregúntenos sobre los requisitos relacionados con ellas y la frecuencia de los tratamientos.
