

MODEL SG-75

Track Stump Grinder

Lead the industry in production with the Bandit SG-75 rubber track mounted stump grinder. Make wide cuts through stubborn stumps with the **80" wide swing**, and chase roots nearly two feet deep. Expandable and retractable tracks make it possible to navigate challenging terrain and provide a stable foundation for grinding. And with its **industry leading chip containment**, cleanup will be easier than with any other stump grinder in its size class. Simply put, this unit will **out-grind the competition**, and should be your front-line stump grinder.

SG-75

POWER THROUGH STUMPS

Stump grinding professionals will benefit from the efficiency and swift rate at which the Bandit SG-75 can move and reduce volumes of stumps on a jobsite. The SG-75 is outfitted with a powerful 74 horsepower Kohler diesel engine and features an efficient gear box drive system to power the 27" diameter cutterwheel.

SUPER SWEEP

Bandit's Super Sweep prevents unseasoned grinders from taking too big of a cut and stalling the engine by automatically backing the cutterwheel away from too aggressive of a cut. When the engine recovers its RPM, the cutterwheel will continue.

THE RIGHT TRACK

The rubber tracks on the SG-75 expand to 55", creating an extremely stable platform for grinding. And for transportation and fitting in tight areas, the tracks retract down to 35", easily fitting through most backyard gates. That means this unit is capable of high production land clearing, but also capable as a backyard grinder in residential settings.

THE KING OF CONTAINMENT

Engineered for maximum chip containment along with fold down chip curtains, the SG-75 collects massive amounts of debris into a concentrated pile under the machine reducing the time needed for clean-up after grinding is completed.

POWER AT YOUR FINGERTIPS

Control your machine with Bandit's intuitive radio remote control. Every function on the unit is yours to command with the push of a button – including the swing speed, the plunge depth and more.
