

SEPTEMBER 2022 NEWSLETTER

The Colorado Springs Orchid Society will have its September 2022 meeting on Saturday the 24th at Fire Station #14, 1875 Dublin Blvd. The fire station is at the intersection of Academy and Dublin behind Yorkshire Veterinary Clinic. From Academy Blvd, turn east onto Dublin, then take the first right. The meeting starts at 10:00 AM with social time and set-up between 9:30 AM and 10:00 AM.

REMINDER: This month is our auction, so please read our President's Message for the details and look at the orchids that will be available on the 4 pages immediately after his message. Since we have so many orchid plants for our auction this year, please wait for another month to bring in any orchids you would like to donate. We will not have a raffle but please bring your blooming orchids for Show & Tell. If you have orchid supplies, books, or anything else 'orchidy' that you would like to donate to our auction you can either bring them this month or wait for another month.

CSOS 2022 Calendar

October 22 – TBD

November 26 (Elections) – TBD

December 17 – TBD

Other Announcements:

To Our New Members

Cheryl Graysar (Joined in July 2022)

Nancy Adams & Marisa Schavey (Joined in August 2022)

Save the Dates – The Denver Orchid Society will have a Show and Sale on October 14–16, 2022 at the Denver Botanic Gardens. Setup for the event will be on October 14th. Please see our President's Message for more information.

President's Message

Bulb. Wilmar Galaxy Star

These cool mornings remind me that fall is here. Hopefully this may induce Mother Nature to provide us with some little last of that rarest of items, moisture.

We will be looking to distribute some blooming size orchids among our membership for a small bit of revenue in return. It is expected that these plants will bring in less than what was expended on them but the idea in the first place was to spend some of our funds for the benefit of our members, so enjoy. There will be plenty of plants as our first special rate orchids were grower's choice (Norman's Orchids) and included only Phalaenopsis. So our buyer then issued another order with only the standard volume discount that then included an array representing various orchid families.

The Fall Show by the Denver Orchid Society will be on the weekend of October 15th and 16th. Our orchids will be displayed under the Colorado Springs Orchid Society banner. Please consider coming to the show and exhibiting some of your blooming orchids. You might contact me beforehand about taking plants you would like to show but don't want to make the trip to the Denver Botanic Gardens on **Friday** for entries. There is also a need for helpers to prepare the show and maintain and entertain other members and the visiting public. Not hard work.

See you on the 24th,
Roger Stone
President, Colorado Springs Orchid Society
Email: stonerog@gmail.com

This page and the next 3 pages are the 2022 Auction Plants that will be available at the September meeting. Pick your favorites and join us at the meeting on Saturday to place your bids!

Aerangis luteoalba var *rhodostica* Note: Charming miniature species. A wonderful miniature from Kenya, this species' blooms have spectacular crystalline white 1" flowers with a red-orange tip on the column. These plants are easy to grow but should just dry at the roots between watering. When in flower, keep slightly more moist at the roots. Grow in Phalaenopsis light and conditions. These plants grow very well mounted or in pots, either in New Zealand sphagnum moss or a tree fern mix.

Angraecum leonis (Ivory x Easter) Note: Miniature growing. This unique species is native to the Comoros Islands and Madagascar. It has unusual scimitar-like leaves that are fused as a single stiff blade. Its beautiful porcelain white flowers are long lasting and have a very nice fragrance at night! This plant likes more water than other Angraecums-if you keep it on the dry side you will start to see puckered or withered leaves. Water as the potting media approaches dryness.

Blc. Taiwan Big Lip 'FANGtastic' This long-lasting flower is very striking and has the largest and flattest lip with vibrant pink striations. Fragrance during the day is even stronger at night. Can be grown in a pot, hanging basket, or mounted. Excellent for growing on a windowsill or under lights. Grow in bright indirect light with good air circulation and moderate humidity. Water generously during active growth but allow to dry out between waterings. Fertilize regularly. Easy to grow and bloom. Perfect plant for beginner and experienced growers alike. This amazing plant belongs in every collection. Award quality. Highly recommended.

Bulbophyllum lasiochilum Note: Fragrant, Robust Plant This miniature *Bulbophyllum* is found in Thailand and Malaysia. It flowers summer to fall producing an umbel of one to a few flowers on a short 4cm. inflorescence. A pleasant surprise is its strawberry fragrance. This is an easily grown small species, happy under Phalaenopsis conditions of partial shade and warmth, and very highly recommended for every orchid collection.

Cirrhopetalum pulchellum 'Note: Husky Plant.' Endemic to Malaysia and Thailand, this little charmer loves the heat! In the fall its mature pseudobulbs produce 2-3" miniature inflorescences ending in an umbel of up to ten creamy white flowers with fine pin-dots of raspberry. Grow in a pot or basket under partial shade with ample water year 'round. Small enough to enhance any collection and happy under even the highest temperatures!

Den. kingianum A delightfully sweet raspberry fragrance graces this temperature-tolerant Dendrobium species! Producing up to 15 flowers on each compact 6" apical spike, this vigorous and compact grower withstands both high and low frost-free temperature extremes. From late winter through spring, it bursts forth with multitudes of small fragrant pink flowers, each accented with deep pink accents over its white lip. An easy grower which can readily reach specimen size for the ultimate display. Highly Recommended

Den. Stardust 'Firebird' (unicum x Ukon) Fiery orange, lightly fragrant flowers adorn this compact growing Dendrobium! Winner of the Best Dendrobium at the 2004 AOS Spring Members' Meeting, it's capable of putting on quite a show producing 3-5 flower clusters per node. Well grown plants have been known to produce over 200 6.5cm long-lasting flowers, each crowned with a large orange lip accented with red veining. Highly Recommended!

Den, Tianmu Fangming Jade 'Sweet' A compact nobile-type Dendrobium hybrid perfect for growing under lights! The canes are 6-8" tall and bear full sized unique flowers. Dozens of flowers are borne on old canes and newly matured canes. The back of the flower is green! The flowers have a very heavy substance and are extremely fragrant. Give a drier and cooler winter rest for best flowering. Can be grown on a bright windowsill, under lights, or in an orchid cabinet. This is a wonderful beginner plant for your first nobile-type Dendrobium. Highly recommended.

Grc. Black Comet 'Norman's Indigo' (Ency.cochleata x Guarechea MiVa Etoile Noire) Note: Very long-lasting flowers. Flowers can range in color from pale blue to dark purple and open one or two at a time, sequentially on either side of the spike. Can bloom continuously for up to 4-6 months as the spike continues to grow and elongate. Mature plants can be in bloom all year round. This is an excellent plant for beginners because it is easy to grow, tolerant of heat, and a reliable bloomer.

Paphiopedilum Keyeshill (Carl Keyes x Winston Churchill 'Indomitable' FCC/AOS) Note: Limited. Complex Paph. breeding at its best! With the famous Paph. Winston Churchill as its pollen parent, this population has been producing handsome boldly marked progeny with wonderfully flat flowers for a complex hybrid, resulting in nice broad dorsal sepals and petals. Highly Recommended!

Paph. Shirley Amundson One of the nicest Paph. primary hybrids. The attractive, compact, variegated foliage is beautifully mottled with a light white/green background overlaid with darker blue-green markings. Easy growing and reliable blooming. The 12-18" inflorescence bears one single, long lasting, 2½-3" flower. Grow in medium light and intermediate to warm temperature with high humidity and good air circulation. Can be grown on a windowsill or under lights. Highly recommended for beginners and Paph collectors.

Phal. Montclair Sunset (Blue Ridge Blood x Dragon Tree Eagle 'DT=168' AM/AOS) We are expecting a novelty phalaenopsis with a wonderful fragrance, excellent substance, deep color, very vigorous grower, and often gives 2-3 flowers on first bloom seedlings, which is rare in novelty phalaenopsis. Good potential for award.

Slc. Little Hazel 'Red Jewel' (Slc. Hazel Boyd x Sl. Psyche) A true miniature in the world of red Cattleyas with its dwarf growth only reaching 4-6" in height! This little hybrid will flower twice a year with flowers that last for weeks. And like many miniatures, it can easily be grown and flowered under lower light conditions, similar to that for Phalaenopsis. A perfect little candidate for under-lights and windowsill growing. Highly Recommended!

Zygodontum triste is an easy to grow, small sized, intermediate to warm growing terrestrial or lithophyte. Plant stays small and blooms in the fall on an erect, inflorescence with up to 6 (2-2.5") stunning flowers. These are soft-leaved plants that like bright light and dislike direct sunlight, especially in the hot months. When the flowers first open, they smell like fresh ground pepper. As they get older the scent becomes more spicy floral. This species grows well with Phalaenopsis since they have similar requirements. It does not need a cool winter to flower. Rarely found in the marketplace. Highly recommended.

Phal Hula Girl 'Aloha' (Little Gem Stripes x Crystal Lady) – In Bud/In Spike. Miniature, soft pink pastel Phal. with a bright rose lip. Great for windowsills or under lights.

Phalaenopsis Kenneth Schubert 'Hualien Blue Wave' (violacea var coerulea x pulcherrima 'Peloric') Note: New Release. This blue primary hybrid is an often-sought-after orchid. In Bud/In Spike!

Phal. Norman's Blue Dragonfly – Double spike! Very nice fragrance.

Phal. Norman's Burgundy Twinkle 'White Lip' (Kaoda Twinkle 'Chocolate Drops' AM/AOS x pulcherrima) Note: New! We are thrilled to offer this breakthrough in harlequin Phal breeding. After years of trying, I am extremely proud of the result! Its robust growth, compact leaves, heat tolerance, lots of red harlequin-colored flowers with heavy substance, diamond dusted texture, and long-lasting flowers make this perfect for growers with limited space. Will grow well on a windowsill or under lights. We expect awards from this spectacular clone. Highly recommended!

Phal. Norman's Green Butterfly 'Hot Lip' (Fuller's AD-Plus 'OX050' FCC/AOS x Prospector's Dream. 'FANGtastic Green' AM/AOS) – In Bud/In Spike. Note: Waxy Flower Substance. Check out the awards on the pedigree for this one! Medium-height spike. Very nice yellow in petals and lip. Can be grown on windowsills or under lights.

Phal. OX Red Sesame 'Peacock' Note: New limited tissue culture clone! Very compact with shiny round leaves for its type of breeding. Abundant fragrant, well-shaped, non-fading, long-lasting, waxy flowers are held above the foliage on medium height spikes. Sequential blooming plants have a multi-spike habit. Do not cut the flower spike unless it is brown and dry. Can be grown either on a windowsill or under lights. A must have for any modern novelty Phal. breeding program. Highly recommended for lovers of novelty Phals and fragrant orchids. We expect many flower-quality awards.

Phal. Yongli Christmas Tree 'Sunrise' (Zuma Pixie x Sogo Medal) – in Bud/Double Spike. This is the ultimate novelty multi-floral Phal at its best. Excellent for growing under lights or on a windowsill. A miniature, mature cloned plant. Highly recommended.

Dtps. Taisuco Beauty x Phal. Ruey Lih Stripes – Please Note: Photo is of Phal. Ruey Lih Stripes. This cross previously bloomed however no photo of it or Dtps Taisuco Beauty are available.

Phal. Sogo Yenlin 'Variegata' A great new variegated form of pink multi-floral miniature! Capable of producing multiple branching spikes of small rich purple-pink flowers, its variegated (yellow & green) foliage makes it extremely attractive, even when not in flower. The degree of variegation produced in the leaves will vary slightly according to light. Intriguing & Highly Recommended!

Some more of Roger's August Blooms:

Rlc. (Tickled Pink 'Blumen Insel' x Llano)

C. (Aloha Case 'Ching Hua' AM/AOS x Culminant 'La Tuilerie' AM/AOS)

Brassia unknown "Lee Ann"

A few more of Roger's August Blooms:

Psh. fausta

V. Alan Ashe Patterson

Alcra. Peggy Ruth Carpenter

Three more of Roger's August Blooms:

Bulb. digoelense

Gom. Moon Shadow 'Tiger Tail' AM/AOS

V. Loke

More of Roger's August Blooms:

Bulb. carunculatum

Onc. naevium

Bct. Winnie Makaea 'Wild Thing'

Van. Lou Sneary

Two more of Roger's August Blooms:

Aerdv. Liberty Creek

Mex. Ghiesbrechtiana

C. labiata (h.f. amoena x h.f. amesiana) grown by Kaoru Stabnow

Terry Bernard's August Blooms:

B. nodosa 'Susan Fuchs' FCC/AOS

Phal. bellina 'Star' AM/AOS

C. Maui Plum 'Volcano Queen' AM/AOS

Kathy LaBree's August Blooms:

Phrag. Noirmont

Bulb. putidum

Onc. Pacific Command 'Hulna Road' AM/AOS

Ctt. Bobbie's Novelty

Sandy Richard's August Blooms:

Angcm. magdalenaean

Den. Burana Dark Blue

Joe Genova's August Blooms:

Paph. unknown (Maudiae hybrid)

Paph. Magic Lantern

Paph. Memoria Arnie Linsman

Jean Garren's August Bloom:

Psh. cochleata

Joan McCann's August Blooms:

Rlc. Dora Louise Capen 'Lea' AM/AOS

Bc. Memoria Vida Lee 'Limelight' AM/AOS

Bc. Yellow Bird

Ett. Volcano Trick 'Paradise' AM/AOS and Paph. Toni Semple grown by Jack Willcox

V. falcata and Den. auriculatum grown by Lois Dauelsberg
