

2018-2019

CHILDREN'S DYSLEXIA CENTER, INC.

Multisensory Structured Literacy Education Training

MSLE training, which incorporates the principles and methodology of the Orton Gillingham method, will teach you how to provide intervention for students who have a specific reading and writing disability, also known as dyslexia. Topics include: building letter to sound correspondences, developing phonological awareness, morphology, orthography, comprehension, vocabulary, and fluency. This class is open to teachers, paraprofessionals, parents or any individual wanting to help children as an independent practitioner. For more information, contact the Children's Dyslexia Center-Bangor.
