

SHARKS AND MINNOWS

"Sharks and Minnows Soccer" is an exciting and fast-paced game that combines soccer skills with evasion tactics. Here's a brief description of how to play:

Mark out a square area using cones or markers. The size of the area should be appropriate for the number of players, allowing for free movement but keeping the action close and engaging.

The referee takes on the role of the "shark." The shark's objective is to kick the soccer balls of the minnows out of the playing area.

The rest of the players are the "minnows." Their goal is to dribble their soccer balls around the marked area while avoiding the shark's attempts to kick their ball out.

Once a minnow has their ball kicked out, they become a shark, working together to kick the remaining minnows' balls out.
