

Care and Usage Instructions for Bracelets and Necklaces

Thank you for choosing our jewelry! Our bracelets and necklaces are crafted from natural semi-precious stones, beads made using traditional firing techniques, and silver components. Due to the nature of these materials and craftsmanship, minor imperfections may be present. To ensure the longevity and beauty of your jewelry, please follow these care and usage instructions:

1. General Handling

Handle the jewelry gently to avoid damage to the semi-precious stones and handmade beads.

Avoid dropping or hitting the jewelry against hard surfaces, as this may cause chipping or cracking.

2. Storage

Store your jewelry in a soft pouch or separate compartment to prevent scratches and tangling.

Keep it away from direct sunlight and humid environments to maintain its natural color and texture.

3. Avoiding Chemicals

Keep the jewelry away from chemicals such as perfumes, hairsprays, and cleaning agents. These can tarnish or damage the beads, stones, and silver components.

Remove the jewelry before swimming in chlorinated pools or seawater.

4. Cleaning

Clean the jewelry gently with a soft, dry cloth. Avoid using abrasive materials or harsh cleaning agents.

Do not soak the jewelry in water, as it may weaken the thread or adhesive used in its construction.

5. Wearing and Removal

When wearing or removing the jewelry, do so gently to avoid stretching or breaking the thread.

Avoid wearing the jewelry during strenuous activities or sports.

6. Silver Component Care

Silver parts may naturally tarnish over time due to exposure to air and moisture. To remove tarnish, gently polish the silver with a soft silver polishing cloth.

Avoid aggressive rubbing, as it may scratch the surface.

Store the jewelry in an airtight container or anti-tarnish pouch to slow down the tarnishing process.

Avoid contact with sulfur-rich substances, such as rubber bands, latex, or certain foods (e.g., eggs, onions).

7. Acknowledging Natural Characteristics

Minor imperfections, variations in color, and surface texture are inherent to natural semi-precious stones and traditional beads. These unique characteristics are a testament to their authenticity and craftsmanship.

8. Regular Maintenance

Check the string, clasp, and silver components periodically for signs of wear and tear.

For repairs or adjustments, please feel free to contact us or consult a professional jeweler experienced with handmade or natural gemstone jewelry.

By following these guidelines, you can preserve the quality and charm of your jewelry for years to come. Thank you for your care and attention.
