

A MOMENT IN TIME WITH A LIFETIME OF CONSEQUENCES

Steve Millican

Steve Millican shares an unforgettable compelling firsthand account of an electrical injury that changed his life forever. Steve engages his audiences in a way that touches hearts and inspires them to continually engage in one of their most important tasks every day — to conduct their work safely.

Steve gives his personal experience, knowledge and insight along with discoveries from other significant incidents he has witnessed. His audiences from across the nation are in awe of what they learn about what it's like to live a difficult life of anguish and pain for over 35 years. They are in awe of what they learn about how they can avoid a serious injury that is life-altering. Steve's message will make a change in your organization's safety culture by raising the awareness of every person who hears him.

LEARNING OUTCOMES

Audiences who experience Steve's keynote will be reminded that:

- > **Everyone must take personal responsibility for safety**
- > **Properly wearing appropriate personal protective equipment is fundamental**
- > **Human performance factors can increase the risk of injury**
- > **Life as it exists today can be changed in a moment**
- > **The important roles in their lives can be forever altered by injury**
- > **An injury is costly not only to the company but also to the injured and their family**
- > **Traps can be avoided when they speak up**

- > **Supervisors, Managers, and Executives**
- > **Electrical Engineers**
- > **Safety Officers**
- > **Substation Operations**
- > **Transmission and Distribution Linemen**
- > **Electricians**

ABOUT STEVE MILLICAN

Steve Millican has worked in the electrical and gas utility industry for over 40 years. In 1983, Steve's life turned into a catastrophe as he came in contact with 7200 volts while working atop a ballpark lighting system. Steve's story portrays how a lack of safety changed his life from that of a completely healthy lineman to living with a

lifelong handicap. Steve has dedicated his story to utilities across the country to save lives of others that work in the field. Steve's story has opened the eyes of thousands and continues to build his reputation of a safety professional.

Steve has worked with the Electrical Power Research Institute (EPRI) for over 20 years on the Switching, Safety, and Reliability committee. Steve has developed a best in class reputation with companies from Hawaii to Puerto Rico.

Steve and his wife Tami have been married 23 years and have 4 children and 7 grandchildren. Steve's hobbies are traveling with the family, sports and sporting events, and spending time with the grandkids.
