

# THE PERSONAL SIDE OF SAFETY

Lee Shelby

## PROGRAM DESCRIPTION

After losing both arms in a tragic workplace incident at the age of 28, Lee Shelby chooses to educate, motivate and inspire audiences by sharing the recount of his occupational injury as well as the importance of making safety personal. Lee's down to earth approach makes this presentation one of the most moving, inspirational, and motivational accounts you will hear.

Lee incorporates personal responsibility, humor, emotion, sincerity and real-life discussion in every presentation. His desire is for everyone to be responsible for their own safety and watch out for their co-workers, take safety personal and to return home safe to their families.

## BENEFITS

- > **By raising awareness and educating employees we hope to reduce injuries**
- > **Fewer injuries will reduce insurance and workers compensation payout**
- > **By reducing injuries, safety will increase productivity**
- > **More productivity brings about an increase in revenue and continuation of employment**
- > **Fewer injuries means employees and families DO NOT suffer**
- > **Help employees develop a questioning attitude about safety and a "Brother's Keeper" mentality and approach to the job**
- > **Helping all employees realize why working safe is *not optional* and the consequences of shortcuts, complacency and distractions by using myself as a living example**

## ABOUT LEE SHELBY

Lee Shelby is a Power Lineman from Tennessee who at the age of 28, lost both arms resulting from an occupational injury after he came in contact with more than 12,000 volts while working for a utility company. Lee returned to work in less than one year with the ambition to be an active part of society. Lee actively teaches and shares his story of “The Personal Side of Safety” with thousands across the United States and in other countries in every industry.

Never backing down from a challenge, Lee is an international speaker and OSHA and NFPA trainer. Lee is currently working on his bachelor’s degree in Occupational Safety and Health. He is an author, a private pilot and enjoys skydiving as well coaching baseball.
