

ON THE SHARPEST END OF UNEXPECTED EVENTS

Dr. Rich Gasaway

PROGRAM OVERVIEW

This training program focuses on helping your workers improve situational awareness and high-risk decision making during periods of high vulnerability. In day-to-day operations, your workers need to know how to develop and maintain situational awareness and how to use situational awareness as the foundation for their good decision making.

But during periods of high vulnerability, well-developed situational awareness, used as the foundation for making high-risk decisions, can reduce — or prevent — workplace casualties, reduce damage to assets and the environment and help reduce the exposure of the organization to expensive litigation and fines that can result from poor decision making.

During periods of high vulnerability, well-developed situational awareness establishes a strong foundation for making high-risk decisions and can reduce

- > **Low Frequency**
- > **High Risk**
- > **High Stress**
- > **Rapidly Changing Conditions**
- > **Fast Decision Making**
- > **High Consequence Potential**

OBJECTIVES

This training program will help your organization and workers:

- > **Identify periods of high vulnerability that create risk for worker safety and for the organization.**
- > **Ensure workers have the knowledge, skills and abilities to develop and maintain strong situational awareness.**
- > **Provide tips and best practices for improving high-risk decision making**
- > **Reduce near-misses and mishaps.**
- > **Help the organization reduce exposure to litigation and fines that can result when workers make poor decisions.**

ABOUT DR. GASAWAY

Drawing on his experience from over three decades in the fire service, Dr. Rich Gasaway help organizations improve worker safety by ensuring team members understand how to develop and maintain situational awareness while working in high-stress, high-consequence, time-compressed environments.

Rich Gasaway helps organizations identify opportunities to improve high-risk decision making outcomes and implement strategies that help team members improve critical thinking and resilient problem solving skills.

As a result of his work, managers, supervisors and trainers often share with him their team members are better equipped to develop and maintain situational awareness and they make better decisions in high-stress, high-consequence, time-compressed environments.

Dr. Gasaway is a published author of books and articles that are used as a resource for government and industry clients. He has served several government agencies include NASA, the US Department of Homeland Security, and the US Department of Defense. He has also worked with Exxon/Mobil, Syncrude Oil Refinery, Suncor, Canadian Natural Resources Limited, Nuclear Fuel Services
