Superior Water For You & Your Home

THE FUTURE OF WATER TREATMENT IS HERE TODAY

The Honest Water Filter Company is proud to offer the "Ultra-Filter" whole-house water filtration system, a patented design by Aquamor Water Technologies.

Filtered water is more necessary than ever with today's municipal water. However, bottled water is expensive, and not environmentally-friendly. It also doesn't address bathing, cooking and cleaning needs. Bottled water also does not protect your plumbing.

-  **Sub-Micron Filter (0.015)** provides 99.99% four log reduction meaning any solid objects suspended in water will be removed by the filter as long as the objects are larger than sub-micron 0.015 in size. This includes bacteria, cysts, and even viruses.
-  **Low operating cost** and flexible programming to handle most water sources and conditions, including wells (Well Report Required).
-  **Self-cleaning cycles** ensure longer cartridge life and filtering abilities.
-  **Complete design** ready to install
-  **Optional chemical reduction & scale control** is available with Silver Plus post cartridges that are NSF-Certified to treat up to 530,000* gallons.
-  **Holds NSF Certification 53** (for microbiological water purifiers certified for health and sanitation) based on the recommendations of the EPA's Task Force Report, Guide Standard and Protocol for Testing Microbiological Water Purifiers (1987) (Annex B).
-  **Certified to treat up to 1,000,000* gallons.**

**TREATS UP TO
1,000,000 GALLONS**

ULTRA FILTER

Diamond/Silver System Shown

Features Silver (HWF-4925PHC) Post Filters For Chemical Reduction And Hard Water Solution. Post Filters are NSF certified For Up To 530,000* Gallons Combined Capacity.

*Under normal water conditions. For use on municipal water or wells with a well report and consultation with the Honest Water Filter Team. Polyphosphates are recommended for water up to 20 grains per gallon of hardness.

DIAMOND ULTRA-FILTER CERTIFICATION

Tested and Certified by NSF International against NSF/ANSI Standard 53 for the reduction of claims specified on the performance data sheet. This filter is certified to reduce specific contaminants, but individual water quality may vary. For best results, test your water to ensure this product meets your specific filtration needs.
