# **THANK YOU FOR** CHOOSING Adventure We are excited to share our latest collection with Choosing adventure We are excited to share our latest collection with Choosing adventure Ch

you, designed to bring joy and adventure to children's playtime.

Our vision is to be the premier playset crafter today and tomorrow.

Our mission is to act with integrity in all we do to create the safest play and best entertainment experiences that grown-ups trust and children love.

Our purpose is to create unforgettable childhood memories.

manufactured in the USA.

## **OUR GUARANTEE/WARRANTY**

As parents ourselves, we wanted a warranty that is simple, easy to understand, and protects the purchaser. We felt our warranty should reflect our confidence in the high-quality swing set that we offer. That is why we came up with our industry leading warranty.

Warranty protection from date of original purchase.

### I YEAR

No questions asked! If anything on your swing set breaks, fades, or affects the integrity of the swing set, we will send a crew (within 200 miles of any of our warehouses) to fix the issue. The only exception is willful damage, normal wear and tear, or an act of God.

### **5 YEAR**

Your swings, slides and accessories are guaranteed against manufacturer defects. We will send the part to the closest dealer in your area. If you don't live close to a dealer, pay for the shipping, and the part will arrive at your house.

### 20 YEAR

Your swing set frame comes with a solid guarantee against manufacturer defects, providing you with peace of mind. We will send the part to your closest dealer. If you don't live close to a dealer, pay for the shipping, and the part will arrive at your house.

If you are located farther than 200 miles from our closest warehouse, we will ship the part to the closest dealer or directly to your house.

## ASTM STANDARD AND INSPECTION

#### Do we need a swing set that meets ASTM standards?

This is an important question that will need to be answered before you purchase a swing set. If your swing set is being used in a commercial environment, then the answer is most likely "yes." A commercial environment would be considered one of the following: parks in residential neighborhoods or for HOAs, churches, daycares, and RV Parks, just to name a few. To be sure, you can contact your insurance company or local government authority to verify if an ASTM compliant commercial swing set is needed.

Once you have confirmed that you need a commercial swing set, make sure the playset you purchase is ASTM compliant. If the swing set will not pass ASTM standards, then the playset is not suitable in a commercial environment and will fail inspection by your insurance company's CPSI inspector. At Adventure World Playsets, all of our commercial swing sets are ASTM compliant. With a commercial swing set and mulch package, we offer free on-site inspections from one of our in-house certified CPSI inspectors. We will give you a letter stating that your commercial playground and surface meet all ASTM requirements. This letter will satisfy all government agencies and insurance companies.

#### Please meet our two inhouse CPSI certified inspectors:

- John Logan
- Ryan Logan

#### Do I need a commercial swing set?

If your swing set will be used in a commercial setting, more than likely the answer is yes. However, to be sure, check with your insurance provider and local governing body to get their advice. They will tell you if a commercially rated swing set is necessary.

#### **Are your sets ASTM compliant?**

Absolutely! We have two in-house certified CPSI inspectors that can help with any questions you might have.

### Do you offer on-site inspections to certify the swing set?

Again the answer is yes! When you purchase one of our commercially rated swing sets with the mulch and border package, we will offer you a free on-site inspection by one of our CPSI certified inspectors. You will receive a letter stating that your playset and area meet ASTM standards. You can present this letter to your insurance company or local governing body.

#### What playground surfacing should we use?

All of our packages come with rubber mulch and our faux stone border. Poured in rubber flooring can also be quoted. If you would like to have your own surfacing installed, we can give you the fall height requirements for your surfacing. However, the free on-site inspection will not be included if you choose to install your own surfacing.

### What about leveling the ground and site preparation?

We are more than happy to help you with that, but the prices shown don't include these services. Please contact us if you would like more information.

### FREQUENTLY ASKED QUESTIONS

#### Can I design a custom commercial swing set?

We love custom swing sets. If you would like to build a custom set, you will work directly with our CPSI inspector to build the set of your dreams.

### How do your vinyl sets compare to metal sets?

We give a 20-year warranty on the frame and 5-year on all accessories. Metal swing sets are not as attractive and give off a cold feel. Furthermore, they tend to be more expensive. We think you will love the quality and look of our swing sets!

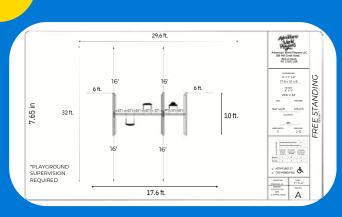

## FREE STANDING SWING BEAMS

#### **DESCRIPTION**

- 12' Swing Beam
- 5' Swing Beam

Max. Fall Height .......7'

## **CUSTOM DESIGNS**

#### We love custom designs!

Adventure World Playsets has two in-house, dedicated CPSI certified inspectors that will work on your project. After the initial consultation, our team will start working vigorously to create the ultimate ASTM compliant playground for your area. They will give you an architectural drawing that shows the exact dimensions of the project. We will also guide you in the selection of the surface to meet ASTM standards. To get started, we will need just a few things from you.

- 1) What is the age of the children that will be playing on the commercial swing set?
- 2) What is the total area you have to work with?
- 3) What is your budget for the project?
- 4) What playset items are important to you and the children that will be playing on the structure?

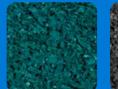

Once we receive the above information, we will present to you a commercial swing set that will meet your needs and budget. After looking at the commercial playset that we present, we are willing to make any changes that you feel are necessary. Our team will work hard to make sure the project is perfect and exactly how you want it.

## RUBBER MULCH, MATS, & CURBING

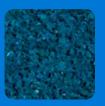

Make your playsets extra awesome with 9-inch stone curbing and a bouncy 6 inches of rubber mulch for ultimate safety and fun! A shock-absorbing, protective surface is top on the safety checklist for home playgrounds. Adventure World Playsets recommends installing your home playground equipment over rubber mulch to reduce the likelihood of injury from falls. Grass, dirt, carpet, or thin mats are not considered protective surfaces because they lack the ability to absorb shock; concrete, asphalt, or other hard surfaces are even more dangerous.

#### **RUBBER MULCH**

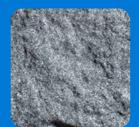

**STONE CURBING** 

**Greystone** 

Cobblestone San

**Sandstone** 

- Faux stone looks like natural stone.
- Easy installation process. Hammer spikes to secure.
- Strong, durable and holds its integrity through the wear and tear of daily life.
