Case Study

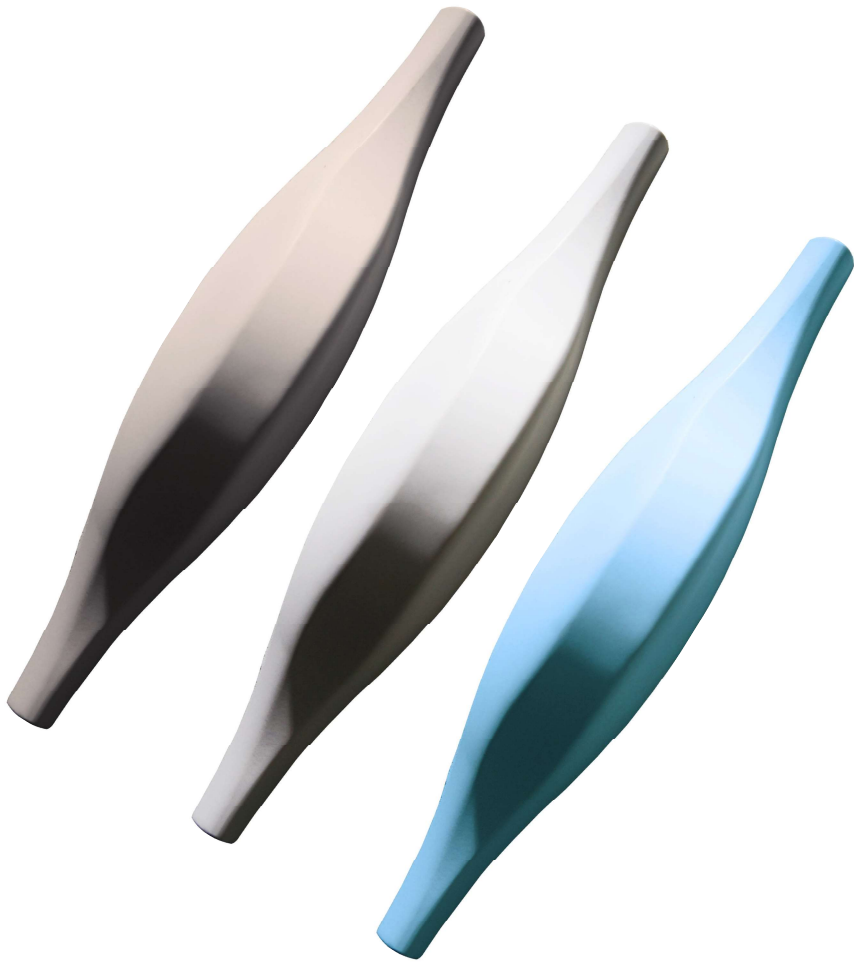

Introduction

3D cement brick is made of concrete UHPC cement as cementing material, sand and stone as aggregate, and is formed in the mold after mixing. After drying and demoulding, cement bricks are formed. 3D cement brick surface is delicate, three-dimensional feeling is super, a variety of color styles, widely used in indoor background wall, milk tea shop door, clothing store restaurant door, desktop facade, club and so on.

Introduction

Product name: 3D cement brick

Product specifications: A variety of specifications and styles

Product features: Whole body color, three-dimensional sense of strong concave and convex

Applicable styles: Hills, waves, arc plane, geometric modeling and so on

Installation

Step 1: Before installation, please determine the installation position, line and measure the size because it is shaped brick. This will help you avoid too much cutting.

Step 2: Wall treatment and cleaning is complete.

Step 3: Glue; as per the manufacturers instructions for construction.

Please use good quality tile glue and structural glue.

Notes:

1. Do not use acidic or corrosive products for cleaning!
2. Use a feather duster or dry fabric for daily cleaning. During regular cleaning, wipe the brick with a damp microfiber cloth.
3. Use a spray bottle with water and add a few drops of special cleaner. Spray the solution directly onto a microfiber cloth for cleaning.
4. For "heavy" stains such as oil stains, grease, floor care product residues, floor gloss, shoe prints, soot, etc. We recommend a slightly alkaline general cleaning product. We can also provide professional cleaning cream cleaning products.
