Monitoring

Monitoring

9

IDTheftDefense begins monitoring a named member's, Personally Identifiable Information, PII, as soon as the account is activated.

To activate , members simply need to enter their name, address, date of birth and social security number.

Members must be able to properly answer two questions about their credit history to successfully authenticate their account.

The spouse and dependent child monitoring will require separate set up by accessing the member portal.

Alerts

Alerts

15

Identity Threat Alerts

Members receive an alert via email or push notification on the IDTD mobile app if their information is found online. Alerts contain details on the threat, including links to where the exposure occurred – giving members the opportunity to look over the info to either dismiss the notification or escalate the issue with our Licensed Private Investigators.

Instant Hard Credit Inquiry Alerts

Credit report inquiries are created when a member's PII is used to apply for bank/credit cards, utility or rental query or many types of loans – including home, auto, business, mortgage, home equity or student loans. IDTD notifies members when their information appears on these reports, empowering them to take action if their data has been exposed by reviewing the alert with an investigator.

Credit Threat Alerts

IDTD monitors for changes or updates found on the member's credit report in real time. It pulls data from over 200 million files that represent nearly every credit-active consumer in the United States.

Monthly Credit Score Tracker

The credit score tracker gives members the ability to watch their TransUnion credit score on a monthly basis with a map that shows a 12-month historic view of their credit trends from the past year – beginning when the service was first activated.
