Businesses must have an established relationship with 4MyCiTy

4MyCiTy Supplies Most of the packaging as needed, any support is greatly appreciated

Food is distributed based on the locations current need and storage capabilities, based on real time discussions with 4MyCiTy

No one likes to throw away good food, But lets be honest, it's a whole lot easier to find a dumpster than it is to find a food bank that can take it.

This is why we created Food Alert!

FOOD SAFETY

We Only accept food that has been professionally handled and prepared by a certified food facility. Only foods that has not been put out in front of guests or tables can be donated. Foods for donation must be kept properly refrigerated until the time of pickup and not open to contamination. Food is distributed based on type, distance and the need of the charities that participate in our program.

LIABILITY

The Bill Emerson Good Samaritan Act protects donors from civil and criminal liability when they donate foods that they reasonably believe to be apparently wholesome.

COSTS

Packing up and delivering the food takes time and packaging materials cost money. We do not charge a fee for our service but do accept any in kind donations that will help support our cause.

RELIABILITY

We understand how important it is that food is handled and distributed in a timely manner. That's why our team and our process is tailored to each donation specifically to avoid contamination and waste. We work with our Charities to ensure that the foods distributed meets theirs needs and that they have the capacity to store properly upon delivery. We take pride in the professional and personal relationships we have built with our partners.
