

**At 4MyCity®, Our focus is on the Importance of Environmental Sustainability. Primarily the Sustainable Management of Food in relation to reducing food waste. Our program limits the harmful effects caused by food waste on our environment while improving food security for families within our communities.**

**Over 125 Million Pounds of food rescued & distributed Since we launched in October 2018 through December 2021. That is an estimated 104 Million meals.**

**Phase 1 - Source Reduction:** we currently run a food rescue operation that partners with businesses to collect and distribute their potential food waste. We rescue cooked and uncooked foods, food scraps are also accepted as part of our community composting initiative. Business can contact us to help with food waste Audits and educational seminars for their teams. Our program has a primary focus on healthy foods, so we foster relationships with Produce Distributors and the farming industry.

**Phase 2 - Feed the Hungry:** all foods collected are distributed through our network of dedicated partner organizations. We choose our partners based on their ability and willingness to help us distribute all rescued foods to families facing food insecurity. Any food not fit for human consumption and can be safely served to our animal friends are diverted accordingly to our partner farms.

**Over 75 Million Pounds of food Distributed in 2021 (that's an estimated 62 Million meals served to families facing hunger)**

**Phase 3 - Industrial/commercial use:** We understand the connection between the health of the planet and the impacts of disposable food packaging. Our focus is to advance Zero Waste Systems in relation to food service products. Helping our partners be better stewards of the environment through the use of our line of Bio-degradable serving products.

**Phase 4 - Composting:** we have successfully partnered and tested a very unique line of Automatic on site commercial composters. Our composter is capable of turning 100lbs of food waste into 10-15lbs of nutrient-rich soil amendment within a 24hr cycle. The compost is distributed through our network of partners for them to focus on growing healthy foods personally or in community gardens/green spaces.

**Over 15 Million Pounds of food waste Diverted from landfills and incinerators since we launched in October 2018 through December 2021. That's equivalent to 17,114 cars taken off the roads (reduction of 6,606 Metric tons of CO2e emissions)**
