

Polymer Concrete, Inc.

"Real World Solutions"

LETTER OF SOLE SOURCE

To whom it may concern,

This letter is to confirm that RESURF®LR and RESURF®II polymer concrete are sole source products. They are manufactured, sold and distributed exclusively by Polymer Concrete, Inc.

RESURF®LR and RESURF®II are the only general purpose concrete repair products in the marketplace that combine a polyester binder with patented shrink control technology.

Unlike epoxy-based polymer concretes, traffic can be returned in a few hours, year round.

RESURF®LR also is unique in that the aggregate blend contains un-bondable polyethylene beads so that internal stress relief is effected.

This internal stress relief from cure and thermal stresses allows reflective cracking when placed across any kind of bridge deck crack.

No other Portland cement concrete general purpose repair system has these unique capabilities.

Thank you for your interest in our products,

Sincerely,

Glenn Robinson
