

- Technology addiction
- Prematurity
- Cerebral Palsy
- Aggressive behaviors
- Apraxia of Speech
- Genetic Disorders
- Delayed Reflex Integration
- Articulation and Language Disorders
- Neurological Disorders
- Swallowing Difficulties
- Cognitive impairments
- Torticollis
- Intolerance to change in routine

**Leads to brain activity pattern changes and learning challenges.**

**Automatic Reflex movements are essential for the development of balance, mobility, vision, hearing, speaking, learning and communicating.**

**Sitting on The Floor, Knees Together, and Feet Pointing Outward to the side**

**Delays in Social and Functional Skills**

**Ex: leaving the house, changing task, transitioning, and food choices**

**Impacted by fine motor coordination, hand and core strength, and body awareness**

**Everyday Tasks such as Dressing, Feeding, Bathing, Toileting & More.**

**Physically attacks others, self-injurious behavior, screaming or yelling**

**Traumatic brain injuries, post-concussion syndrome, cerebral palsy, stroke, etc.**

**Brain processes information from the 7 senses**

- Fine Motor Delays
- Sensory Integration/ processing difficulties
- Letter Reversal
- Visual Motor/ Perceptual Delays
- Attention Deficit Disorder (ADD)/ Attention Hyperactivity Deficit Disorder (ADHD)
- Voice and Fluency Disorders
- Poor sense of balance
- Poor attention
- Gross Motor Delays

**Delays in rolling, crawling, walking, and other activities that use the arms, legs, and torso**

**Struggles with organization skills and focusing**
