

Schumann Brothers Birdfeeder

Invented by kids. Made by kids.

One Tree planted
with each purchase!

Introducing the Galaxy Saver™

2015: It started as Robbie's 2nd grade project. The assignment was to invent a product only using recycled materials. A plastic bottle, a metal bottle cap, a shoelace, and a pencil were perfectly meshed to create the "Galaxy Saver" which will not only save the Earth, but also the galaxy! Five years later the Galaxy Saver™ continues to attract birds and provide endless entertainment for our dog, Mitzi, who loves to chase the birds.

2020: The Schumann Brothers decided to work together to turn the Galaxy Saver™ into a business. Assisted by dad, Robbie and Alex collaborated to fine tune the design and streamline manufacturing while still keeping it made of recycled and recyclable materials. This process has taught the boys about working together, product development, manufacturing, quality control, inventory management, sales, marketing, and the environment.

Do you have the perfect place for a Galaxy Saver™ at your home?

**Please see our web site for more info
and to place an order!**

Thank you for supporting kids and birds!

Your Purchase Includes:

- Galaxy Saver™ made using recycled and recyclable material
- Bag of bird seed
- Hook for hanging
- Donation to TeamTrees to plant one tree in your honor
- Endless Entertainment!
