The Story That Changes How Teachers See Students

In this keynote, educator and speaker Kari Horn Lehman shares the powerful story of her son Cal and the teacher who changed the trajectory of his experience in school with one simple shift.

A single question changed how she saw him, and how he saw himself. From that story, the session connects to a truth that educators immediately recognize:

Every student experience, classroom moment, and outcome begins with how a teacher sees the student in front of them.

Curiosity strengthens four conditions that make rigorous learning possible
