

## BACtrack - Handheld Breathalyzer

### Breathalyzer with Facial Recognition Technology

The first pocket size handheld video digital breathalyzer to securely monitor breath alcohol.

The device takes a video of the user during the breath test to positively verify identity. Master video is taken during enrollment.

### Offering the best alcohol monitoring device

By integrating a smartphone app with a handheld breathalyzer, BACtrack allows participants to easily and discreetly submit BAC tests at any time, at any location. Video verification and GPS location information is transmitted; along with the BAC results, after each test.

*Specialized Mouthpiece*  
 BACtrack's mouthpiece was specifically designed for the criminal justice market to minimize the risk of test manipulation by the participant. This mouthpiece is standard for BACtrack and unique to Track Group for Work Release or Home Detention
