

Charging Instructions and caring for your monitor

You are required to charge your monitor every other day for 1 solid hour – uninterrupted	
DO NOT charge while sleeping	
DO NOT go swimming	
This device is water resistant. It is ok to shower but it is NOT ok to submerge it.	
Plug the charger directly into a wall outlet. Do not plug the device into a car or any other means of power, other than a wall outlet.	
Clean your charger weekly with rubbing alcohol and QTips. Your charger has a magnetic connection. Cleaning as instructed will provide you with best results. Also clean the part on your monitor where the charger plugs into.	
If you work construction or any type of job where the monitor may become stained/damaged, cover it to avoid a replacement fee of \$750. This includes: Paint, particals, dirt, etc.	
Audio Messages on your monitor:	
Charge on: When the device is plugged in, the device will generate the ‘Charging has begun’ audio command.	
Charge Off: When the device is removed from the charger, the device will generate the ‘Charging has stopped’ audio command.	
Warning Battery: At the 40% threshold, the device will generate the ‘Battery warning, using a pre-recorded audio message Please charge your device as directed’ audio command	
Low Battery: At the 30%, the device will generate the ‘Battery alert, using a pre-recorded audio message You must immediately charge your device as directed’ audio command.	
NOTE: If your monitor’s battery gets below 30%, the bail agency may sound the siren on your monitor as a demand to plug in and charge immediately.
