Offering the best device in the industry for Low-Risk Offenders.

Combines cellular and global positioning system (GPS) technologies, patented device that straps to an offender's ankle.

Integrates a physical tracking device with a sophisticated GPS software system and a Monitoring Center to provide real-time location tracking 24/7.

Multiple Inclusion and Exclusion Zones per Offender, with Automatic Buffer Zones used.

Ideal Solution for Work Release or Home Detention

Requires charging every day for a solid 2 hours.
