

Role	Plant Manager
Type	Permanent
Salary	Very attractive + Negotiable
Location	North Central Nigeria
Benefits	Medical + accommodation + Allowances + Car + Bonus

The company is a large size regional contractor with an annual turnover in the region of \$20million and is looking for experienced and committed people to join its existing team to work on new and existing Highway construction projects.

As Plant Manager you will have had a proven track record of running employees efficiently and effectively. You should have hands on approach with a strong “delivery” focus with your team and are committed to safety and excellence in the workplace.

You must have trade certificates and at least 15 years’ experience on heavy earthmoving equipment and other associated construction equipment.

Responsibilities include training of front line supervisors; provide overall support to the Plant Maintenance department and control of a plant maintenance workforce. Other responsibilities include coordination and short term planning, trouble shooting and the day-to-day supervision and directly supervise shop and field maintenance activities.

Additional duties will include parts ordering for future and current tasks and the training of employees in fault finding including the reading of electrical, pneumatic and hydraulic schematics.

You will ensure all maintenance activities are carried out in a safe and efficient manner and to instil and nurture a safe working environment within the maintenance department.

To be considered, you must possess:

- Mechanical/Electrical Engineering or Trade qualifications
- A minimum of 10 years post trade experience
- A minimum of 5 years supervisory experience
- Well developed knowledge of mobile equipment, planned maintenance systems, familiarity with computer diagnostics in mobile equipment trouble shooting
- Extensive experience in maintenance of diesel engines, Mercedes tipping trucks lorries, asphalt pavers
- Extensive experience in the maintenance of a modern fleet of heavy earthwork equipment e.g CAT wheel loaders, D8R dozers, motor graders, excavators, scrapers and mobile cranes
- Knowledge and experience of the maintenance of quarry and asphalt plants and Atlas Copco drilling rigs would be a distinct advantage

To be successful in this role you will need to be able to demonstrate sound leadership qualities.
