

RESTEC Solutions

SONOPRO

The next generation in disinfection

Safe automated disinfection for reusable items

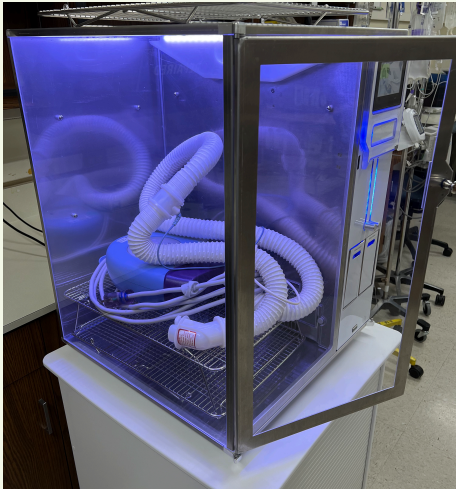

*Kills 100% of common hospital pathogens
in less than 5 minutes*

How RESTEC can help you reduce human-error risk factors

At the push of a button our SONOPRO provides point of care disinfection in less than 5 minutes. Our organic, food grade disinfectant has excellent compatibility with sensitive electronics like patient monitors and infusion pumps. Broad spectrum efficacy with no occupational exposure to chemicals.

As simple as the push of a button

100% kill for germs and spores

3rd party testing confirms SONOPRO's ability to deliver total kill against *s. aureus*, *m. smegmatis*, *s. pyogenes*, *b. subtilis*, *p. vulgaris*, *p. aeruginosa*, and *e. coli*.

FDA cleared type II device

RESTEC is offering the first FDA type II device specifically designed for clinical staff to disinfect low-risk items at point-of-use.

Significant labor savings

A team of 14 healthcare workers fully integrated the SONOPRO into their department workflow saving 4 hours of work per day.

Electronics compatible

Patient monitors, infusion pumps, pulse ox probes are among the many electronics compatible with the SONOPRO.

Automated, fast & mobile

Just push a button. Cycle time is less than 5 minutes. Use it wherever you have a wall outlet. No need for venting or plumbing.

Validated process

Meets ANSI/AAMI/ISO 11138-11140 standards for cycle validation.

N95 mask compatible

The Sonopro passed 3M's stringent material compatibility testing.

Organic, food grade disinfectant

We use aerosolized hydrogen peroxide with PAA. A powerful, fast acting organic food grade disinfectant.
