Skin Therapy

Custom Priced

Designed for chronic skin issues. We will come up with a therapy plan in coordination with your veterinary treatments to aide in healing the skin and promote hair growth and/or strength. We start with a consultation where we will look at what treatments and diagnoses your pet has received and develop a weekly, bi-weekly, and monthly regimen complete with custom ordered products to start the healing process. Please note: these plans work best with consistency and time. The vet addresses your pets health needs and we address your pets skin needs! Pricing varies depending on pet needs. Prepayment is required before products are ordered and your pet is added to the schedule.
