

# Science and Technology Class

## **Creationism and Evolution: The Debate of Human Origin**

Wednesdays 10:00-11:00 Grade 10-12

Instructor: Mrs. Gabriele Murphy

While exploring the evidence for evolution and creationism, we will explore human origin from the theoretical, biological, philosophical, anthropological, and other various perspectives. We will begin with the Young Earth vs. Old Earth arguments. This class is a logic based discussion and will revolve around research and debate.

## **Science Tutoring**

Wednesdays 10:00-11:00 Grades 1-4 and 5-9

Instructor: Mrs. Raciti and Mrs. Herrera

Students will be able to have support and extra help with their science work and may also get a fun lab or two.

## **Code Academy**

Wednesdays 12:45-1:30

Instructor: Mrs. Gabriele Murphy

Materials: Laptop is recommended

Students will learn the basics of computer programming through fun projects.

## **Physical Science Lab**

Fridays 8:45 – 9:35 Grades 8-10

Instructor: Mrs. Lee Herrera

Materials Needed: Notebook and Folder and Apologia Student Notebook if Applicable

Each week students will participate in high school level labs as it is outlined in Apologia's Exploring Creation with Physical Science

## **Astronomy Club**

Fridays 8:45 – 9:35 Grades 10 - 12

Instructor: Mrs. Gabriele Murphy

Materials Needed: Notebook and Folder

Each week students will be exposed to the wonders of the created universe. This class, along with our full time Astronomy students, will also meet in the evenings for hands on observations.

## **Life Science and other cool stuff**

Fridays 8:45-9:35 Grades 4-7

Instructor: Mr. Soren Saenz

Materials Needed: Notebook and Folder

Discover the wonders of the world we live in with this fun hand-on science class.
