

Experience Your Environment

Exploring with Seek by iNaturalist

To learn more about Crystal Cove Conservancy, visit us at crystalcove.org!

Crystal Cove
CONSERVANCY

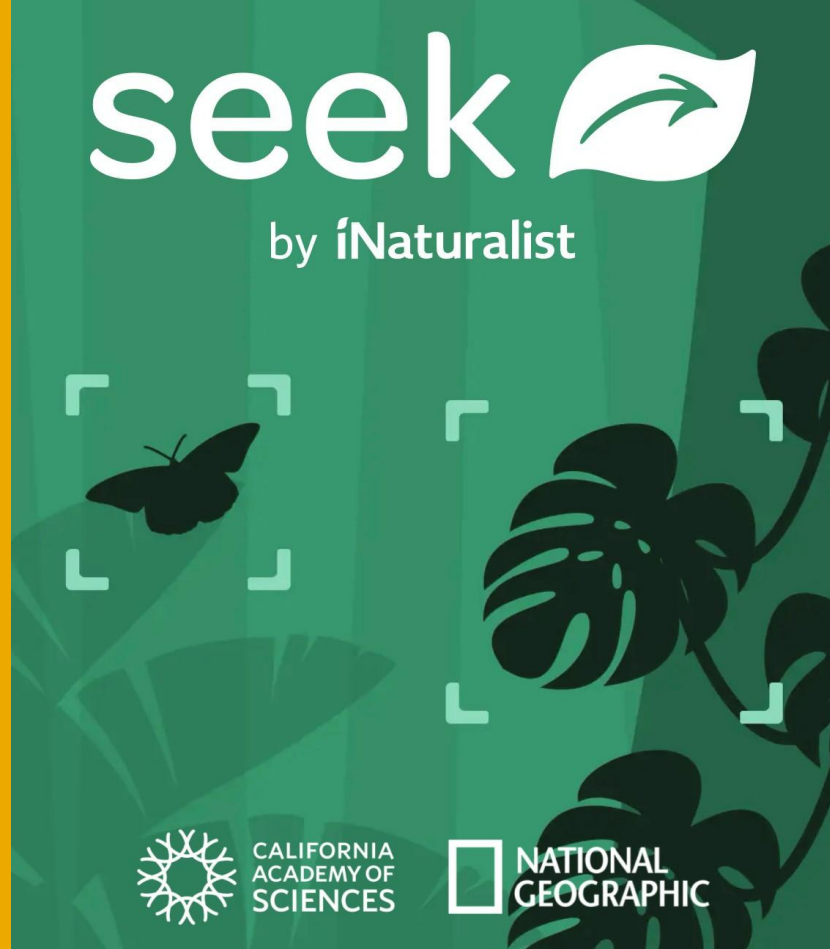

Come discover the plants and animals near you!

Download the Seek app to a smartphone or tablet

Make sure to check with your parents or guardians first!

You can learn more about Seek and download the app [here](#).

Learn how to use Seek to participate in a Bioblitz!

Explore the nature around you using Seek!

- Explore your neighborhood, backyard, patio, or inside your home, and use **Seek** to discover what species you can find!
- To share your observations to our community Bioblitz, create an iNaturalist account on your Seek app and hit the **“Post to iNaturalist”** button whenever you take a photo of a new species on Seek!
- As you identify plants and animals using Seek, write down the common name of each species you identify.

How many different kinds of plants and animals were you able to find?

What species have we found in PYLUSD?

To check out what other students and families have identified, check out our iNaturalist Bioblitz [here](#) throughout the event!

To connect with us and learn more about our other programs, visit us at [crystalcove.org](https://www.crystalcove.org)!
