Ductlab's Low Profile PVC FLAT Ducting System:

Efficient. Certified. Expanded.

Ductlab's Low Profile PVC Duct System offers an advanced, space-saving solution for modern ventilation needs. Engineered for environments with limited ceiling space, our system ensures optimal airflow without compromising on quality or compliance.

Key Features & Benefits

- **Comprehensive Range of Fittings:** Beyond standard offerings, Ductlab provides an extensive selection of fittings, including unique configurations to accommodate diverse installation requirements.
- **Certified Quality:** Our products meet and exceed industry standards, holding certifications equivalent to those of leading competitors, ensuring safety and performance.
- **Space Optimization:** The low-profile design is ideal for high-rise apartments and commercial buildings where ceiling space is at a premium.
- **Durable & Corrosion-Free:** Made from high-quality PVC, our duct system resists corrosion, offering a longer lifespan compared to traditional sheet metal ductwork.
- **Environmentally Conscious:** Manufactured with sustainability in mind, our ducts are made with recycle material & 100% recyclable to contribute to green building certifications.
- **Ease of Installation:** Lightweight components and a user-friendly design reduce installation time and labour costs.
- **Versatile Applications:** Suitable for bathroom, laundry, and rangehood ventilation systems, efficiently handling airflow rates up to 180 L/s.

Pressure drop values are calculated using standard air conditions ($\rho = 1. \text{ kg/m}^3$) and industry reference K-factors. "Total pressure drop" includes 2 m duct friction ($f = 0.025$). "Fitting-only" values represent losses from the component only. Airflow range: 25–175 L/s.

Issue Date : 22/11/2018
Print Date : 13/08/2019

These results only apply to the specimen mounted, as described in this report. The result of this fire test may be used to directly assess fire hazard, but it should be recognised that a single test method will not provide a full assessment of fire hazard under all fire conditions.

Ignition is initiated by a pilot flame that is held near, but does not touch the specimen. A material that does not ignite during the standard test may ignite if contacted with a pilot flame during the test.

Each test specimen was sandwiched between two layers of galvanised welded square mesh made from wire of nominal diameter 0.8mm and nominal spacing 12mm in both directions and the assembly clamped in four places.

The specimens were mounted to simulate use in an unsupported or free hanging mode. The results may be significantly different when mounted to simulate a wall cladding or upholstery application.

Pro-Switch Pty Ltd
CERTIFICATE of VERIFICATION
Best Environmental Practice for PVC

Airvent Australia Pty Ltd

Trading as Ductlab Australia Pty Ltd

ABN: 40 645 147 584

Unit 4, 7 Stubbs Street Auburn NSW 2144 AUSTRALIA

Pro-Switch Pty Ltd confirms that CLIENT has been assessed and found to comply with the Vinyl Council of Australia (VCA) Best Environmental Practice PVC Guidelines v2.0 (BEP 2.0). This includes meeting the criteria and verification evidence requirements for best practice PVC manufacturing, in line with the Green Star PVC Credit (10 May 2011) and the Auditor Verification Guidance – Issue 2.0 (20 November 2013). Airvent Australia Pty Ltd agrees to maintain compliance with BEP v2.0 as published by the VCA (www.vinyl.org.au). Any changes impacting compliance will be communicated to Pro-Switch for review of certificate validity.

The certificate holder is responsible for the preparation and presentation of information about continuing compliance with the requirements throughout the relevant period, in accordance with Compliance Pathway number 2 Manufacturer's Declaration, as established within the Auditor Verification process.

An audit of the Finished Product Manufacturer was conducted on 23/06/2025 utilising the Green Star Credit-Auditor Verification Guidance of the product types listed below.

Airvent Australia Pty Ltd has been found to specifically comply with the following requirements:-

- Manufacture of PVC Resin as supplied to Airvent Australia Pty Ltd
- Manufacture and End of Life Management of PVC Product
- Use of PVC Recyclate in PVC products

Optional Credits

- (1) Responsible Sourcing Policy (3) Modern Slavery Statement (5) Transition to Renewable Energy
 (2) Quality Management System (4) Life Cycle Thinking (6) Packaging Waste
