

The base engine chosen by Aeromomentum for the AM13 / AM15 series is the thoroughly proven Suzuki G-Series engine. Various iterations of this 1.3 / 1.5 Liter design have been mass-produced for automotive and marine use around the world for years. The choice of this engine series was careful and deliberate, driven by sound engineering principles and considerable experience in the field.

Mark Kettering, Aeromomentum Founder and co-owner explains in this article taken from their website:

Why did we choose the Suzuki G-Series engine?
