

## Mandatory Requirements

Please ensure these requirements are carried out prior to your FaceFit Test.

### Requirements

1. Being clean-shaven or having facial hair that does not interfere with the seal of the face mask. This is important to ensure that the mask can create a proper seal around the face.
2. Not wearing any makeup, moisturizers, or lotions on the face. These substances can interfere with the seal of the face mask.
3. Not smoking, eating or drinking for at least 30 minutes before the test. This is to ensure that there are no particles in the air that could interfere with the test.
4. Bringing the mask that will be used during the test (Sundstrom or 3M). This is important to ensure that the mask fits properly and can create a proper seal around the face. If you do not have a mask one will be provided for the test only (masks can be purchased through M.F.F.T if required).
5. Bringing any other personal protective equipment that will be worn with the mask, such as safety glasses or a hard hat.
6. Providing information about any medical conditions or medications that would affect the test results.
7. Providing information about facial features, such as scars or birth marks that could affect the seal of the mask.
