

TRANSITIONING YOUR PUPPY'S FOOD

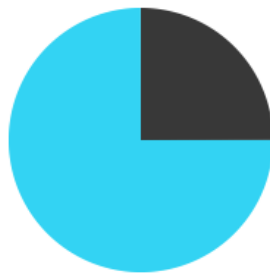

It is recommended that you take 7 days to transition your puppy to their new food. If your puppy's stool becomes loose, try adding some pure canned pumpkin.

● Old Food ● New Food

● Old Food ● New Food

● Old Food ● New Food

● Old Food ● New Food

We recommend a puppy food until 4 months then switch to an adult or non-age specific formula.

Please ensure your puppy gets their daily pumpkin, probiotic, and NuVet Plus during this transition to maintain gut health.
