Top Threats of 2023

In mid 2022 75% of cyber security professionals suggested that social engineering is the largest risk to organisations. Since then the trend of large companies getting caught out with this threat has continued with organisations such as Dropbox and Uber getting caught out.

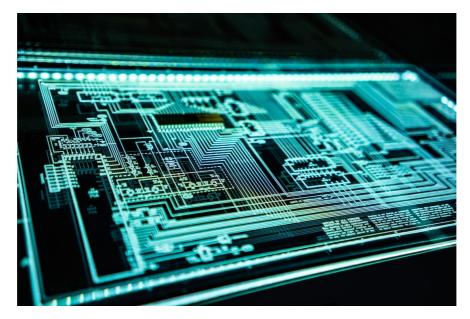

Smart Devices to Become a Major Target?

As smart devices become more commonly used in homes it is no surprise that they have been outed as a major risk in 2023. A prediction of 75 billion smart devices being connect by 2025 backs up this prediction.

Why was the computer late for work?

It had a hard drive.

Piers Morgan Twitter Account Hacked

After a bunch of tweets, some being directed at the past Queen and Ed Sheeran, Piers Morgan has claimed his Twitter account was hacked.
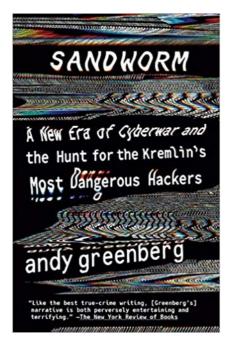

It comes after the account of the UK education secretary, Gillian Keegan, appeared to be hacked on Christmas Day. Her account replied to several tweets with links to websites advertising cryptocurrencies such as bitcoin.
