The Untold Story of the Boldest Supply-Chain Hack Ever

It was late 2019, and Adair, the president of the security firm Volexity, was investigating a digital security breach at an American think tank. The intrusion was nothing special. Adair figured he and his team would rout the attackers quickly and be done with the case—until they noticed something strange.

JabbaScript.

Ex-Uber CSO gets probation for covering up theft of data

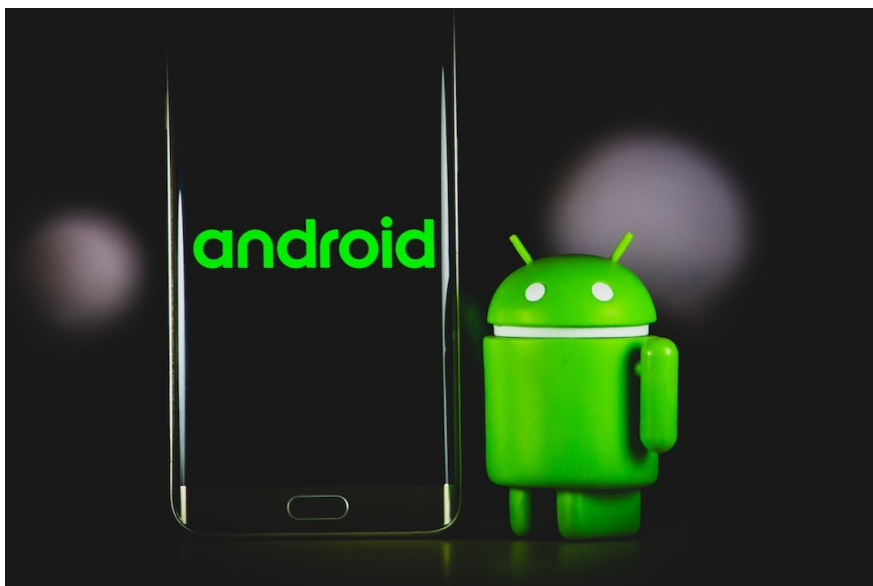

Joe Sullivan was sentenced to three years of probation plus 200 hours of community service for his role in covering up Uber's 2016 computer security breach and trying to pass off a ransom payment as a bug bounty. He was found guilty of two felonies related to covering up the theft of data from Uber's IT systems.

New Fleckpe Android malware installed 600K times on Google Play

Fleckpe is a malicious Android subscription malware that generates unauthorized charges by subscribing users to premium services, and has been active since last year. Fleckpe is a malicious app that decodes a hidden payload and executes it to contact the C2 server and subscribe the victim to a premium service.
