#### CYBERSEC WEEKLY

# **\$515 Million Stolen From FTX**

Just a day after filing for bankruptcy, FTX has said it's investigating into suspicious cryptocurrency transactions that could suggest a potential hack.

After a statement from the chief executive saying "unauthorised access to certain assets has occurred."

#### **Customers Are The Ones Who Are Paying**

Customers have lost billions in crypto deposits. This has lead to criminal investigations and is likely to implement large lawsuits.

### Government Considering Making Ransomware Payments Illegal

Since the Medibank and Optus data breaches the Australian government has plans to prevent ransomware payments. The person in charge of this decision is Clare O'Neil.

She was quoted as saying: "There's some really big policy questions that we're going to need to think about and consult on, and we're going to do that in the context of the cybersecurity strategy."
