

The Cyber Security Workforce Gap Grows Again in 2022

A 3.4 million demand for workers in Cyber Security has been declared in 2022. This is a 26.2% increased compared to 2021 and it doesn't look like its going to slow down any time soon.

How has COVID affected Security Recruitment?

During the pandemic it looked like companies were closing in on the gap, this was partially helped by work from home. Since many companies have returned to working from the office or to hybrid working and requiring employees to be based where they work. Furthermore, companies are recovering from the pandemic and there is now a higher competition over workers and trying to encourage entry level workers to their organisations.

Microsoft Causes over 65000 Companies Data to be Publicly Available

A statement has been released by Microsoft confirming that the misconfiguration.

"This misconfiguration resulted in the potential for unauthenticated access to some business transaction data corresponding to interactions between Microsoft and prospective customers, such as the planning or potential implementation and provisioning of Microsoft services," ~ Microsoft.

The misconfiguration was found by SOCradar on September 24th.
