## Ukraine Signs Cybersecurity Deal With NATO

Ukraine has taken another step toward deepening its ties to NATO by signing an agreement to formalize its participation in the security alliance's Joint Center for Advanced Technologies in Cyber Defense (CCDCOE).

The CCDCOE functions as a cyber-defense knowledge hub, research institution, and training and exercise facility that assists members with technology, threat-sharing and policy expertise.

## **Russian Hackers Target US Hospitals**

Russian hackers have targeted eight US hospitals in a huge cyberattack after Joe Biden confirmed he would send tanks to Ukraine. Hacking group Killnet, which is affiliated to Russia, has reportedly claimed responsibility for the cyberattack.

The University of Michigan Hospital and Stanford Health Care Center have reported issues with their websites and portal services.

## Data From 10m JD Sports Customers Stolen

JD Sports has warned that around 10 million people might have had their addresses, phone numbers and email addresses among other things stolen in a hack that hit the retailer.

The business said payment card details were safe, and that it has no reason to think the hackers have accessed users' passwords.
