

## **How Behavioral Science is Used To Improve Security**

Approximately 82% of attacks were due to human error (<https://www.verizon.com/business/resources/reports/dbir/>). This can be seen by the number of phishing emails which are sent.

### **Scientists Want to Create An Unconscious Habit**

They're also suggesting to make it easy by forcing defaults such as MFA. This is because many people won't go out of the way to do this.

## How Elon Musk Will Affect Cyber Security at Twitter

Twitter already has plenty of vulnerabilities and Cyber Security risks. This is due to it being a social media platform, which are notorious for having a large attack surface, And which the large layoffs Musk has for twitter how could this affect Cyber Security?

Firing a large amount of the twitter workforce has already lead to plenty of backlash, and this could be even more problematic if some of the employees take matters into their own hands.
