

Junior Technician – Job Description

Operational Solutions Ltd is an industry leading company at the forefront of Counter – Unmanned Aerial Systems (CUAS) innovation and development in both the civilian and military environments. Due to expansion after successfully winning contracts to provide CUAS to major international Airports we are now looking to recruit a Junior Technician (Equipment Engineer) to join our existing Technical Team on a full-time basis.

The post comes with a competitive salary package, a work pension and 25 days holiday plus Bank holidays.

About You:

We are looking for an entry level equipment engineer who has recently qualified in some form of engineering course at college or university. No prior work experience is necessary as we will provide training. However, those with 1-2 years' experience can still apply. You will have a track record of being a diligent, hard worker through school/college performance reports or from a manager if you already have work experience. You will be an individual who acts with integrity at all times but also have an entrepreneurial spirit to learn more, understand the equipment and be looking to advance through the competency levels.

Essential Qualifications:

- A-C GCSE in STEM subjects.
- Clean driving license and own transport.

Desirable Qualifications and skills:

- Engineering qualifications such as an NVQ, Diploma, Undergraduate degree.
- Proficient in Microsoft Office software.
- Good practical skills.

Some of your duties will include:

- Flying test drones at CUAS equipment.
- Assist in the installation of CUAS radars, EO/IR cameras, Radio Frequency Detectors plus other CUAS sensor types.
- Assist in the maintenance of all CUAS sensor types deployed on site.
- Assist in establishing communication networks between sensor types.
- Develop relationships with the technical support departments with suppliers
- Remote operation of official CUAS capabilities installed at customer sites
- Troubleshoot technical problems and issues, determining technical actions in accordance with product, and recommending solutions to representatives for coordinative product solutions.
- Maintain a clean work environment and operate with high quality operating principles during maintenance activities.
- Comply with all Safety and Security policies and procedures.
- Maintain professional relationships with all personnel assigned.

Some of the Skills and Requirements we are seeking are:

- Basic senior networking (LAN etc)
- Basic electrical skills
- Demonstratable tech know how
- Proficient in Microsoft Office software
- Good practical skills (Desirable)
- Values: Flexible, hardworking, integrity

What OSL will do for you:

- Pay to get you fully security (SC) cleared
- Pay to get you an SIA Licence.
- Pay for you to get a commercial drone pilots licence

If you are looking for a new challenge and an opportunity to work for a dynamic company that values its staff, then we would like to hear from you.

For more information on this position and to apply for the role we have, please send a copy of your CV and a short covering letter to the following email addresses;
steve.h@operationalsolutions.co.uk & nat.c@operationalsolutions.co.uk
